gap between how Americans view their country and how it is viewed abroad Drawing on broad research and personal experience while avoiding anecdotalism and polemics the writers gathered here combine political cultural and historical analysis to explain how people in different parts of the world see the United States They show that not all anti Americanism can be blamed on U S foreign policy America is disliked not just for what it does but also for what it is and perceptions of both are profoundly shaped and sometimes warped by the domestic realities of the countries where anti Americanism thrives In addition to analyzing America s battered global reputation these writers propose ways the United States and other countries can build better relations through greater understanding and respect *PC Mag* ,1998-12-15 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology
