Jasper Rubin, 2016-09-27 *A Negotiated Landscape* examines the transformation of San Francisco's iconic waterfront from the eve of its decline in 1950 to the turn of the millennium. What was once a major shipping port is now best known for leisure and entertainment. To understand this landscape, Jasper Rubin not only explores the built environment but also the major forces that have been at work in its redevelopment. While factors such as new transportation technology and economic restructuring have been essential to the process and character of the waterfront's transformation, the impact of local grassroots efforts by planners, activists, and boosters have been equally critical. The first edition of *A Negotiated Landscape* won the 2012 prize for best book in planning history from the International Planning History Society. Much has changed in the five years since that edition was published. For this second edition, Rubin provides a new concluding chapter that updates the progress of planning on San Francisco's waterfront and examines debates over the newest visions for its development.

The Report: Papua New Guinea 2015 Oxford Business Group, 2016-09-17 In Papua New Guinea, hopes are high that real change is on its way. The country's political, administrative, financial, and technical leaders now have to find a way to ensure the most productive distribution and use of financial resources. Many international actors are watching closely to see how this young country negotiates its path. Papua New Guinea became a major exporter of gas in 2014 when the 19bn PNG liquefied natural gas (LNG) project was completed ahead of schedule and within budget, significantly increasing the size and strength of the economy. The year ahead is likely to see PNG benefit from the further development of its hydrocarbons sector, fuelling the growth of its economy as a whole. The LNG influx also poses challenges, however, in terms of ensuring inclusive growth and productive use of the new revenues. PNG takes pride in being a final frontier of natural and cultural development, but the task ahead is to protect the country's heritage while becoming part of the global economy. **Protests as Events** Ian R

Lamond, Karl Spracklen, 2014-11-05 Can activism be considered a leisure activity? Can the Occupy movement, local campaigns for change, and lone acts of personal resistance be understood as events? Within the field of Events Management, the content of events is generally analyzed within three categories: culture, sport, or business. Such a typology can be helpful as a heuristic for interpretation and analysis within a commercial paradigm. However, this framework overlooks and depoliticizes a significant variety of events, those more accurately construed as protest. *Protests as Events* is the first book to explore activism as a leisure activity and protests as events, using a fresh interpretation of event to develop a new critical politics of events and leisure. Bringing together a range of cutting-edge research from around the world, it explores a variety of protests through the lens of events studies and leisure in order to understand how the study of events management might be conceptualized in the protest space. Sickening Anne Pollock, 2021-08-17 An event-by-event look at how institutionalized racism harms the health of African Americans in the twenty-first century. A crucial component of anti-Black racism is the unconscionable disparity in health outcomes between Black and white Americans. *Sickening* examines this institutionalized inequality through dramatic, concrete events from the past two decades, revealing how unequal living conditions and

inadequate medical care have become routine From the spike in chronic disease after Hurricane Katrina to the lack of protection for Black residents during the Flint water crisis and even the life threatening childbirth experience for tennis star Serena Williams author Anne Pollock takes readers on a journey through the diversity of anti Black racism operating in healthcare She goes beneath the surface to deconstruct the structures that make these events possible including mass incarceration police brutality and the hypervisibility of Black athletes bodies Ultimately Sickening shows what these shocking events reveal about the everyday racialization of health in the United States Concluding with a vital examination of racialized healthcare during the COVID pandemic and the Black Lives Matter rebellions of 2020 Sickening cuts through the mind numbing statistics to vividly portray healthcare inequalities In a gripping and passionate style Pollock shows the devastating reality and consequences of systemic racism on the lives and health of Black Americans

Unequal Neighbors

Kristen Hill Maher,David Carruthers,2021-04-02 San Diego and Tijuana are the site of a national border enforcement spectacle but they are also neighboring cities with deeply intertwined histories cultures and economies In Unequal Neighbors Kristen Hill Maher and David Carruthers shift attention from the national border to a local one examining the role of place stigma in reinforcing actual and imagined inequalities between these cities Widespread bordered imaginaries in San Diego represent it as a place of economic vitality safety and order while stigmatizing Tijuana as a zone of poverty crime and corruption These dualisms misrepresent complex realities on the ground but they also have real material effects the vision of a local border benefits some actors in the region while undermining others Based on a wide range of original empirical materials the book examines how asymmetries between these cities have been produced and reinforced through stigmatizing representations of Tijuana in media everyday talk economic relations and local tourism discourse and practices However both place stigma and borders are subject to contestation and the book also examines debordering practices and counter narratives about Tijuana s image While the details of the book are particular to this corner of the world the kinds of processes it documents offer a window into the making of unequal neighbors more broadly The dynamics at the Tijuana border present a framework for understanding how inequalities that manifest in cultural practices produce asymmetric borders between places
