Deterritorializing/Reterritorializing Nancy Ares, Edward Buendía, Robert Helfenbein, 2017-05-10 This volume features scholars who use a critical geography framework to analyze how constructions of social space shape education reform. In particular, they situate their work in present-day neoliberal policies that are pushing responsibility for economic and social welfare as well as education policy and practice out of federal and into more local entities. States, cities, and school boards are being given more responsibility and power in determining curriculum content and standards, accompanied by increasing privatization of public education through the rise of charter schools and for-profit organizations' incursion into managing schools. Given these pressures, critical geography's unique approach to spatial constructions of schools is crucially important. Reterritorialization and deterritorialization or the varying flows of people and capital across space and time are highlighted to understand spatial forces operating on such things as schools, communities, people, and culture. Authors from multiple fields of study contribute to this book's examination of how social, political, and historical dimensions of spatial forces, especially racial, ethnic, and other markers of difference, shape and are shaped by processes and outcomes of school reform.

Sustainable Peace in Northeast Asia Yong-Shik Lee, 2023-09-05 *Sustainable Peace in Northeast Asia* examines the causes of lasting and complex tensions in the region from underlying political, historical, military, and economic perspectives, discusses their historical development and political-economic implications for the world, and explores possible solutions to build lasting peace. The book is unique in that it approaches the topic from the historical perspective of each constituent country in the region. Major global powers such as the United States and Russia have also closely engaged in the political and economic affairs of this region through a network of alliances, diplomacy, trade, and investment. The book also discusses the influence of these external powers over the crisis, their political and economic objectives in the region, their strategies, and the dynamics that their engagement has created. Both South Korea and North Korea have sought reunification of the Korean peninsula, which will have a substantial impact on the region. The book examines its justification, feasibility, and effects for the region. The book discusses the role of Mongolia in the context of the power dynamics in Northeast Asia. A relatively small country in terms of its population, Mongolia has rarely been examined in this context. *Sustainable Peace in Northeast Asia* makes a fresh assessment of its potential role.

The River Paul Vasey, 2013-10-21 A vivacious memoir of life along the Detroit River from the prize-winning reporter, novelist, and CBC broadcaster Paul Vasey.

Cyclescapes of the Unequal City John G. Stehlin, 2019-10-01 A critical look at the political economy of urban bicycle infrastructure in the United States. Not long ago, bicycling in the city was considered a radical statement or a last resort, and few cyclists braved the inhospitable streets of most American cities. Today, however, the urban cyclist represents progress and the urban renaissance. City leaders now undertake ambitious new bicycle

infrastructure plans and bike share schemes to promote the environmental social and economic health of the city and its residents. *Cyclescapes of the Unequal City* contextualizes and critically examines this new wave of bicycling in American cities exploring how bicycle infrastructure planning has become a key symbol of and site of conflict over uneven urban development. John G. Stehlin traces bicycling's rise in popularity as a key policy solution for American cities facing the environmental, economic, and social contradictions of the previous century of sprawl. Using in-depth case studies from San Francisco, Philadelphia, and Detroit, he argues that the mission of bicycle advocacy has converged with and reshaped the urban growth machine around a model of livable, environmentally friendly, and innovation-based urban capitalism. While advocating a more sustainable city for all, the deployment of bicycle infrastructure within the framework of the neoliberal city in many ways intensifies divisions along lines of race, class, and space. *Cyclescapes of the Unequal City* speaks to a growing interest in bicycling as an urban economic and environmental strategy, its role in the politics of gentrification, and efforts to build more diverse coalitions of bicycle advocates. Grounding its analysis in both regional political economy and neighborhood-based ethnography, this book ultimately uses the bicycle as a lens to view major shifts in today's American city.

Budget of the United States Government United States. Office of Management and Budget, 2014 **The Budget of the United States Government** United States. Office of Management and Budget, 2015 Global Perspectives on Language Assessment Spiros Papageorgiou, Kathleen M. Bailey, 2019-02-07 The sixth volume in the Global Research on Teaching and Learning English series offers up-to-date research on the rapidly changing field of language assessment. The book features original research with chapters reporting on a variety of international education settings from a range of diverse perspectives. Covering a broad range of key topics including scoring processes, test development, and student and teacher perspectives, contributors offer a comprehensive overview of the landscape of language assessment and discuss the consequences and impact for learners, teachers, learning programs, and society. Focusing on the assessment of language proficiency, this volume provides an original compendium of cutting-edge research that will benefit TESOL and TEFL students, language assessment scholars, and language teachers. **The Russian State and Russian Energy Companies, 1992-2018** Ingerid M. Opdahl, 2020-06-09 The *Russian State and Russian Energy Companies* analyses the development of relations between the state and five major energy companies and how this shaped Russia's foreign policy in the post-Soviet region. The book argues that the development of Russia's political economy mattered for foreign policy over the quarter of a century from 1992 to 2018. Energy companies' roles in institutional development enabled them to influence foreign policy formation, and they became available as tools to implement foreign policy. The extent to which it happened for each company varied with their accessibility to the Russian state. Institutional development increased state capacity in a way that strengthened Russia's political regime. The book shows how the combined power of several companies in the gas, oil, electricity, and nuclear energy industry was a key feature of Russian foreign policy both in bilateral relationships and in support of Russia's regional position.

In this way Russia's energy resources were converted to regional influence. The book contributes to our understanding of Russia's political economy and its influence on foreign policy and of the formation of policy towards post-Soviet states.

Treatise on Geomorphology, 2013-02-27. The changing focus and approach of geomorphic research suggests that the time is opportune for a summary of the state of the discipline. The number of peer-reviewed papers published in geomorphic journals has grown steadily for more than two decades and more importantly the diversity of authors with respect to geographic location and disciplinary background (geography, geology, ecology, civil engineering, computer science, geographic information science, and others) has expanded dramatically. As more good minds are drawn to geomorphology and the breadth of the peer-reviewed literature grows, an effective summary of contemporary geomorphic knowledge becomes increasingly difficult. The fourteen volumes of this *Treatise on Geomorphology* will provide an important reference for users from undergraduate students looking for term paper topics to graduate students starting a literature review for their thesis work and professionals seeking a concise summary of a particular topic. Information on the historical development of diverse topics within geomorphology provides context for ongoing research, discussion of research strategies, equipment and field methods, laboratory experiments and numerical simulations, reflect the multiple approaches to understanding Earth's surfaces and summaries of outstanding research questions highlight future challenges and suggest productive new avenues for research. Our future ability to adapt to geomorphic changes in the critical zone very much hinges upon how well landform scientists comprehend the dynamics of Earth's diverse surfaces. This *Treatise on Geomorphology* provides a useful synthesis of the state of the discipline as well as highlighting productive research directions that educators and students, researchers will find useful. Geomorphology has advanced greatly in the last 10 years to become a very interdisciplinary field. Undergraduate students looking for term paper topics to graduate students starting a literature review for their thesis work and professionals seeking a concise summary of a particular topic will find the answers they need in this broad reference work which has been designed and written to accommodate their diverse backgrounds and levels of understanding. Editor in Chief Prof. J. F. Shroder of the University of Nebraska at Omaha is past president of the QG/G section of the Geological Society of America and present Trustee of the GSA Foundation while being well respected in the geomorphology research community and having won numerous awards in the field. A host of noted international geomorphologists have contributed state-of-the-art chapters to the work. Readers can be guaranteed that every chapter in this extensive work has been critically reviewed for

consistency and accuracy by the World expert Volume Editors and by the Editor in Chief himself No other reference work exists in the area of Geomorphology that offers the breadth and depth of information contained in this 14 volume masterpiece From the foundations and history of geomorphology through to geomorphological innovations and computer modelling and the past and future states of landform science no stone has been left unturned Books in Print Supplement ,2002
