Geography November 2014 Memo:

Reassessing Lukashenka G. Ioffe, 2014-10-05 What are the factors of Lukashenka's longevity at the helm of power? This question is addressed in the context of Belarusian history and identity not as an outcome of a form of government deceitfully imposed on an allegedly benighted people whom better positioned and informed outsiders seek to enlighten and liberate.

The Legality and Accountability of Autonomous Weapon Systems Afonso Seixas-Nunes, 2022-05-19 By adopting a multi-disciplinary approach, this book provides a comprehensive analysis of the legality of the use of autonomous weapons systems under international law. It examines different arguments presented by States, roboticists, and scholars to demonstrate the challenges such systems will create for the laws of war. This study examines how technology of warfare seeks to increase the dissociation of risk and communication between weapons and their human operators. Furthermore, it explains how algorithms might give rise to errors on the battlefield that cannot be directly attributed to human operators. Against this backdrop, Dr. Seixas Nunes examines three distinct legal frameworks: the distinction between the legality of weapons and the laws of targeting, different mechanisms of individual accountability, and the importance of recovering the category of *dolus eventualis* for programmers and technicians, and finally, State responsibility for violations of the laws of war caused by weapons software errors.

The Politics of Sustainability in the Arctic Ulrik Pram Gad, Jeppe Strandsbjerg, 2018-10-04 The Politics of Sustainability in the Arctic argues that sustainability is a political concept because it defines and shapes competing visions of the future. In current Arctic affairs, prominent stakeholders agree that development needs to be sustainable, but there is no agreement over what it is that needs to be sustained. In original conservationist discourse, the environment was the sole referent object of sustainability; however, as sustainability discourses have expanded, the concept has been linked to an increasing number of referent objects such as society, economy, culture, and identity. This book sets out a theoretical framework for understanding and analysing sustainability as a political concept and provides a comprehensive empirical investigation of Arctic sustainability discourses. Presenting a range of case studies from Greenland, Norway, Canada, Russia, Iceland, and Alaska, the chapters in this volume analyse the concept of sustainability and how actors are employing and contesting this concept in specific regions within the Arctic. In doing so, the book demonstrates how sustainability is being given new meanings in the postcolonial Arctic and what the political implications are for postcoloniality, nature, and development more broadly. Beyond those interested in the Arctic, this book will also be of great value to students and scholars of sustainability, sustainable development, and identity and environmental politics.

The Meritocracy Trap Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy. It is an axiom of American life that advantage should be earned through ability and effort. Even as the country divides itself at every turn, the meritocratic ideal that social and economic rewards should follow achievement rather than breeding remains supreme. Both Democrats and Republicans insistently repeat meritocratic notions. Meritocracy cuts to

the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people *Russia's Cultural Statecraft* Tuomas Forsberg, Sirke

Mäkinen, 2021-11-04 This book focusses on Russia's cultural statecraft in dealing with a number of institutional cultural domains such as education museums and monuments high arts and sport It analyses to what extent Russia's cultural activities abroad have been used for foreign policy purposes and perceived as having a political dimension Building on the concept of cultural statecraft the authors present a broad and nuanced view of how Russia sees the role of culture in its external relations how this shapes the image of Russia and the ways in which this cultural statecraft is received by foreign audiences The expert team of contributors consider what choices are made in fostering this agenda how Russian state authorities see the purpose and limits of various cultural instruments to what extent can the authorities shape these instruments what domains have received more attention and become more politicised and what fields have remained more autonomous The methodological research design of the book as a whole is a comparative case study comparing the nature of Russian cultural statecraft across time target countries and diverse cultural domains It will be of interest to scholars and students of Russian foreign policy and external relations and those working on the role of culture in world politics **The**

European Union and the Black Sea Sinem Akgul Acikmese, Dimitrios Triantaphyllou, 2017-10-02 The idea for this book is derived from the scantiness of academic references on the European Union's policies towards the Black Sea relative to this region's officially stated significance for the EU Even though the EU plays a vital role in Black Sea political agendas the EU's cooperation with the region is not extensively covered by academic discussions and literature This is mostly due to the fact that the EU's focus on foreign affairs is mainly associated with the Balkans as part the current and potential expansion and the Middle East as a direct consequence of the upheaval of the Arab Spring The Black Sea region is crucially important for the EU because of the opportunities and challenges that the region presents both politically and socio economically

Contributions to this book mostly focus on specific issues of EU Black Sea cooperation from conflict to the environment to democracy and how these particular relationships are perceived within the region as well as through the lenses of stakeholders such as Russia Turkey and the USA Overall the collection focuses on projecting a more efficient role and a holistic strategy for the EU in its approach towards the Black Sea region testifying to the need for a strong EU presence For this reason the Black Sea area remains the neighbourhood too close to yet still far from the European Union This book was originally published as a special issue of the Journal of Balkan and Near Eastern Studies Handbook on Wealth and the Super-Rich Iain Hay,Jonathan V Beaverstock,2016-01-29 Fewer than 100 people own and control more wealth than 50 per cent of the world s population The Handbook on Wealth and the Super Rich is a landmark multidisciplinary evaluation of both the lives and lifestyles of the super rich as well as the processes that underpin super wealth generation and its unequal distribution Drawing on international case studies leading experts from across the social sciences offer 22 accessible and coherently organized chapters which critically analyse a range of topics including the legitimacy of extreme wealth from a moral economic perspective biographies of illicit super wealth London s housing markets how the very wealthy fly the environmental consequences of super rich lives crafting immigration policies to attract the rich Students and scholars studying a host of topics such as development studies economics geography history political science and sociology will find this book eminently engaging It will also be of great interest to public commentators charitable organizations and NGOs concerned with wealth and income distributions Netflix Nations Ramon Lobato,2019-01-08 How streaming services and internet distribution have transformed global television culture Television once a broadcast medium now also travels through our telephone lines fiber optic cables and wireless networks It is delivered to viewers via apps screens large and small and media players of all kinds In this unfamiliar environment new global giants of television distribution are emerging including Netflix the world s largest subscription video on demand service Combining media industry analysis with cultural theory Ramon Lobato explores the political and policy tensions at the heart of the digital distribution revolution tracing their longer history through our evolving understanding of media globalization Netflix Nations considers the ways that subscription video on demand services but most of all Netflix have irrevocably changed the circulation of media content It tells the story of how a global video portal interacts with national audiences markets and institutions and what this means for how we understand global media in the internet age Netflix Nations addresses a fundamental tension in the digital media landscape the clash between the internet s capacity for global distribution and the territorial nature of media trade taste and regulation The book also explores the failures and frictions of video on demand as experienced by audiences The actual experience of using video platforms is full of subtle reminders of market boundaries and exclusions platforms are geo blocked for out of region users this video is not available in your region catalogs shrink and expand from country to country prices appear in different currencies and subtitles and captions are not available in local languages These conditions offer rich insight for

understanding the actual geographies of digital media distribution Contrary to popular belief the story of Netflix is not just an American one From Argentina to Australia Netflix's ascension from a Silicon Valley start up to an international television service has transformed media consumption on a global scale Netflix Nations will help readers make sense of a complex ever shifting streaming media environment *Sand, Snow, and Stardust* Gretchen Heefner, 2025-05-05 A vivid tour of US military efforts to understand survive and command harsh environments worldwide and beyond Deserts the Arctic outer space these extreme environments are often seen as inhospitable places at the edges of our maps But from the 1940s through the 1960s spurred by the diverse and unfamiliar regions the US military had navigated during World War II the United States defense establishment took a keen interest in these places dispatching troops to the Aleutian Islands North Africa the South Pacific and beyond To preserve the country's status as a superpower after the war to pave runways and build bridges engineers had to understand and then conquer dunes permafrost and even the surface of the moon *Sand Snow and Stardust* explores how the US military generated a new understanding of these environments and attempted to master them intending to cement America's planetary power Operating in these regions depended as much on scientific and cultural knowledge as on military expertise and technology From General George S Patton learning the hard way that the desert is not always hot to the challenges of constructing a scientific research base under the Arctic ice to the sheer implausibility of modeling Martian environments on Earth Gretchen Heefner takes us on a wry expedition into the extremes and introduces us to the people who have shaped our insight into these extraordinary environments Even decades after the first manned space flight plans for human space exploration and extraplanetary colonization are still based on what we know about stark habitats on Earth An entertaining survey of the relationship between environmental history and military might *Sand Snow and Stardust* also serves as a warning about the further transformation of the planet whether through desertification melting ice caps or attempts to escape it entirely **Civil War? Interstate War? Hybrid War?** Jakob Hauter, 2021-04-20 This volume of collected papers takes stock of what has become known about the war in eastern Ukraine's Donets Basin Donbas between April 2014 and mid 2020 It provides an introduction to the conflict and illustrates the key point of contention in the academic debate surrounding it the question whether this war is primarily an internal Ukrainian phenomenon or the result of a covert Russian invasion The contributions by recognized specialists from Ukraine Russia Germany and Japan offer multifaceted views and insights into this long lasting conflict for both expert readers and those who are new to the topic The volume's contributors are Tymofii Brik Jakob Hauter Sanshiro Hosaka Yuriy Matsiyevsky Nikolay Mitrokhin Maximilian Kranich and Ulrich Schneckener [Experiencing 11 November 2018](#) Shanti Sumartojo, 2020-11-10 In a unique collection of international and interdisciplinary research this book focuses on commemorative events around the world on the same day 11 November 2018 the centenary of Armistice Day the end of the First World War It argues that we need to move beyond discourse narrative and how historical events are represented to fully understand what commemoration does socially politically and

culturally Adopting an experiential reframing treats sensory affective and emotional feelings as fundamental to how we collectively understand shared histories and through them shared identities The volume features 15 case studies from ten countries covering a variety of settings and national contexts specific to the First World War Together the chapters demonstrate that a new conceptualisation of commemoration is needed one that attends to how it feels **Cool** Steven Quartz,Anette Asp,2015-04-14 This engrossing history merges evolutionary biology and economics to explain our spending habits and show how coolness is at the heart of consumerism Mental Floss We live in a world of conspicuous consumption where the things we buy not only satisfy our needs but also communicate our values identities and aspirations In Cool Steven Quartz and Anette Asp bring together groundbreaking findings in neuroscience economics and evolutionary biology to show how our concepts of cool be it designer jeans smartphones or craft beer help drive the global economy Cool puts forth a provocative theory of consumerism based on our brain s innate status seeking and social calculator The authors highlight the underlying processes that guide our often unconscious decision making They also pull back the curtain on choice architects who design store interiors as well as coolhunters who scour Berlin and Tokyo for the latest trends Quartz and Asp follow the evolution of cool consumption from the mid twentieth century through the emergence of the Internet in the 1990s finally unpacking the social motivations behind today s hip ethical consumption Taking us from Norman Mailer to normcore Cool is surprising at every turn and will forever change the way you think about money status and your next purchase The Shadow of the Wall Jeremy Slack,Daniel E.
