The Trans Pacific Partnership, China and India Amitendu Palit, 2014-06-05 The United States and 11 other countries from both sides of the Pacific are currently negotiating the Trans Pacific Partnership TPP The agreement is expected to set new benchmark for international trade through its comprehensive coverage of issues and binding regulations It is expected to eventually mature into a regional trade agreement covering the entire Asia Pacific As of now it does not include China and India the two largest emerging markets and regional economies The TPP has generated controversy for its excessive emphasis on trade issues which have remained unresolved or unaddressed at the WTO due to differences between developed and emerging markets It has also been criticized for adopting a negotiating style reflecting the US regulatory approach to international trade and also as a geo political strategy of the US for supporting its strategic rebalancing towards Asia From both economic and geo political perspectives the TPP has various significant implications for China and India that are examined in the book This book sheds light on how China and India's entries in the TPP are mutually beneficial and how both countries can gain from the TPP by gaining preferential access to large markets and using it as an opportunity for introducing more outward oriented reforms The book also cautions that US must reconcile to the rebalancing of economic power within the grouping that will occur following the entries of China and India Otherwise the TPP and China and India might walk divergent paths and trade and regional integration in Asia Pacific may not ever converge This book will interest anyone who wishes to learn more about the TPP and its future implications and challenges and China and India's roles in global and regional trade

**Territorial Disputes in the South China Sea** J. Huang, A. Billo, 2014-12-09 Heightened tensions in the South China Sea have raised serious concerns about the dangers of conflict in this region as a result of unresolved complex territorial disputes This volume offers detailed insights into a range of country perspectives addressing the historical legal structural regional and multilateral dimensions of these disputes

Religion and the Global City David Garbin, Anna Strhan, 2017-06-29 This is the first book to explore how religious movements and actors shape and are shaped by aspects of global city dynamics Theoretically grounded and empirically informed *Religion and the Global City* advances discussions in the field of urban religion and establishes future research directions David Garbin and

Anna Strhan bring together a wealth of ethnographically rich and vivid case studies in a diversity of urban settings in both Global North and Global South contexts These case studies are drawn from both classical global cities such as London and Paris and also from large cosmopolitan metropolises such as Bangalore Rio de Janeiro Lagos Singapore and Hong Kong which all constitute in their own terms powerful sites within the informational cultural and moral networked economies of contemporary globalization The chapters explore some of the most pressing issues of our times globalization and the role of global neo liberal regimes urban change and in particular the dramatic urbanization of Global South countries and religious politics and religious revivalism associated for instance with transnational Islam or global Pentecostal Charismatic Christianity

**Handbook on Complexity and Public Policy** Robert Geyer,Paul Cairney,2015-05-29 Over recent years Complexity Science has revealed to us new limits to our possible knowledge and control in social cultural and economic systems Instead of supposing that past statistics and patterns will give us predictable outcomes for possible actions we now know the world is and will always be creative and surprising Continuous structural evolution within such systems may change the mechanisms descriptors problems and opportunities often negating policy aims We therefore need to redevelop our thinking about interventions policies and policy making moving perhaps to a humbler more learning approach In this Handbook leading thinkers in multiple domains set out these new ideas and allow us to understand how these new ideas are changing policymaking and policies in this new era Peter M Allen Cranfield University UK *Megaregions* John Harrison,Michael Hoyler,2015-01-30 By critically assessing the opportunities and challenges posed by planning and governing at the megaregional scale this innovative book examines the latest conceptualizations of trans metropolitan landscapes In doing so it seeks to uncover whether m *Handbook on Water Security* Claudia Pahl-Wostl,Anik Bhaduri,Joyeeta Gupta,2016-01-29 Water security has received increasing attention in the scientific and public policy communities in recent years The Handbook on Water Security is a much needed resource that helps the reader navigate between the differing interpretations of water security It explains the various dimensions of the topic by approaching it both conceptually and thematically as well as in relation to experiences in different regions of the world The international contributors explore the various perspectives on water security to show that it has multiple meanings that cannot easily be reconciled Topics discussed include challenges from human security to consumerism how trade policies can help to achieve water security in a transboundary setting the potential of risk based governance arrangements and the ecology of water security Scholars and postgraduate students in the social sciences working on water related issues will find this book to be of substantial interest It will strongly appeal to policymakers and practitioners looking at the strengths and limitations of water security **Accessibility, Equity and Efficiency** Karst T. Geurs,Roberto Patuelli,Tomaz Ponce Dentinho,2016-02-26 Leading researchers from around the world show in this volume the importance of accessibility in contemporary issues such as rural depopulation investments in public services and public transport and transport infrastructure investments in Europe

The trade offs between accessibility economic development and equity are comprehensively examined and a variety of approaches to measuring accessibility and equality presented The book s interdisciplinary contributions also provide different geographical contexts from the US to various European and developing countries and cover ex ante and ex post evaluation of transport investment Improving transport accessibility is a main objective in transport policy and planning in developed and developing countries all over the world Investment is motivated by the need to develop and or reduce spatial or social inequalities However the economic and equity implications of investments in transport are not straightforward The concepts of accessibility and equity can be defined and operationalized in many different ways influencing outcomes and conclusions Moreover equity and efficiency goals are often conflicting Accessibility models not only help to explain spatial and transport patterns in developed and developing countries but are also powerful tools to explain the equity and efficiency impacts of urban and transport policies and projects This state of the art overview of the accessibility economic efficiency equity relationship will appeal to researchers as well as transport and urban planners interested in accessibility issues and transport regional developments

*Handbook on Geographies of Technology* Barney Warf, 2017-02-24 This Handbook offers an insightful and comprehensive overview from a geographic perspective of the numerous and varied technologies that are shaping the contemporary world It shows how geography and technology are intimately linked by examining the origins growth and impacts of 27 different technologies and highlighting how they influence the structure and spatiality of society

, *Framing Civic Engagement, Political Participation and Active Citizenship in Europe* Cristiano Bee, Roberta Guerrina, 2017-12-22 This book evaluates the role that civic engagement political participation and active citizenship can play in promoting the establishment of a European polity The chapters included here examine how the practice of active citizenship is managed and constructed in the context of a European drive to increase civic engagement and political participation in three member states Portugal Italy and the UK and one accession country Turkey Looking at both processes and policies promoting active citizenship at the European and national levels this book uncovers current discourses as well as political priorities and values that surround the activities of non governmental organizations NGOs Of particular interest are debates about the nature and level of civic and political participation and engagement of marginal groups women youths migrants and minorities as they are particularly vulnerable to social exclusion The book focuses on the interaction between institutions and civil society actors addressing a number of questions related to their reciprocal role in influencing shaping criticising or disregarding certain political priorities This book was published as a special issue of the Journal of Civil Society

Traces of a Mobile Field James R Faulconbridge, Allison Hui, 2017-10-02 This agenda setting collection critically reflects upon a decade of contributions to the social scientific mobilities turn in order to propose new trajectories for the future of this interdisciplinary research field The chapters are all exemplars of how the past decade of research has opened up new insights into the place of mobilities in societies They also highlight how attempts to look forward towards new conversations

understandings and interventions in a mobile world will emerge from the transformations invoked by this field of research. Authors foreground issues of power, interdisciplinarity, transformative technologies, fragmented discourses and changing social processes whilst addressing automobility, aeromobility, tourism, communications technologies, urban infrastructures, migration and emergencies. As a whole, the collection raises important questions about not only how understandings of mobilities are changing but also how the field of mobilities research is itself on the move. The evocative empirical cases and provocative arguments in this book thus highlight the necessity of new concepts, conversations, methods, empirical studies and interventions to address transformations in both the complex mobilities of social worlds and what is examined or taken for granted in mobilities research itself. This book was originally published as a special issue of *Mobilities*. **Incomplete Streets** Stephen Zavestoski, Julian Agyeman, 2014-08-27 The Complete Streets concept and movement in urban planning and policy has been hailed by many as a revolution that aims to challenge the auto normative paradigm by reversing the broader effects of an urban form shaped by the logic of keeping automobiles moving. By enabling safe access for all users, Complete Streets promise to make cities more walkable and livable and at the same time more sustainable. This book problematizes the Complete Streets concept by suggesting that streets should not be thought of as merely physical spaces but as symbolic and social spaces. When important social and symbolic narratives are missing from the discourse and practice of Complete Streets, what actually results are incomplete streets. The volume questions whether the ways in which complete streets narratives, policies, plans and efforts are envisioned and implemented might be systematically reproducing many of the urban spatial and social inequalities and injustices that have characterized cities for the last century or more. From critiques of a mobility bias rooted in the neoliberal foundations of the Complete Streets concept to concerns about resulting environmental gentrification, the chapters in *Incomplete Streets* variously call for planning processes that give voice to the historically marginalized and more broadly that approach streets as dynamic, fluid and public social places. This interdisciplinary book is aimed at students, researchers and professionals in the fields of urban geography, environmental studies, urban planning and policy, transportation planning and urban sociology. The Plausible World B. Westphal, 2016-04-30 In *The Plausible World*, the intersections of literature and cartography enable readers to understand that place is anything but purely geographic; a plausible world is created as a strategy to fill the void. Innovative in his approach, Westphal challenges the view that perceptions and representations of space are stable or straightforward. Ireland and migration in the twenty-first century Mary Gilmartin, 2015-07-29 Considers migration to and from and within Ireland in the twenty-first century, covering the Celtic Tiger era of mass immigration to Ireland as well as the dramatic growth in levels of emigration that has occurred since the Irish economic collapse. **Basic Principles of Topography** Blagoja Markoski, 2018-01-18 This book gives a comprehensive overview of all relevant elements in topography and their practical application. It elaborates on the classical representation of terrain on maps such as cartographic projections together with their classification scale and geographical elements. It is

richly illustrated with photographs maps and figures in which the theoretical explanations are clarified Readers will become acquainted with the physical characteristics of the ground i e tectonic and erosive shapes the importance and classification of terrain genetic fluvial abrasive glacial karst and topographic types such as higher mountains hills peaks and lower terrain valleys fields In addition the book discusses cartometry and coordinate systems orientation in space geographic topographic tactical including by means of maps instruments and the night sky and elaborates new techniques and technologies such as aerial photogrammetric imagery global navigation satellite systems and LiDAR The book also includes methods for the practical execution of concrete measurement operations such as determining position and movement on land with maps compass and azimuth which makes it especially useful for practitioners and professionals e g for landscape planning military exercises mountaineering nature walks etc As such it offers a valuable guide not only for undergraduate students but also for researchers in the fields of geography geosciences geodesy ecology forestry and related areas looking for an overview on topography Uniquely the book also features an extensive glossary of topographical terms

*Algorithms for the People* Josh Simons, 2023-01-10 Artificial intelligence and machine learning are reshaping our world Police forces use them to decide where to send police officers judges to decide whom to release on bail welfare agencies to decide which children are at risk of abuse and Facebook and Google to rank content and distribute ads In these spheres and many others powerful prediction tools are changing how decisions are made narrowing opportunities for the exercise of judgment empathy and creativity In this volume Simons flips the narrative about how we govern these technologies Instead of examining the impact of technology on democracy he explores how to put democracy at the heart of AI governance He gets under the hood of predictive technologies offering an accessible account of how they work why they matter and how to regulate the institutions that build and use them The author argues that prediction is political human choices about how to design and use predictive tools shape their effects Approaching predictive technologies through the lens of political theory casts new light on how democracies should govern political choices made outside the sphere of representative politics

Showing the connection between technology regulation and democratic reform Simons argues that we must go beyond conventional theorizing of AI ethics to wrestle with fundamental moral and political questions about how the governance of technology can support the flourishing of democracy      Law and Regulation of Mobile Payment Systems Joy Malala, 2017-11-28 Over the last ten years mobile payment systems have revolutionised banking in some countries in Africa In Kenya the introduction of M Pesa a new financial services model has transformed the banking and financial services industry Giving the unbanked majority access to the financial services market it has attracted over 18 million subscribers which is remarkable given that fewer than 4 million people in Kenya have bank accounts This book addresses the legal and regulatory issues arising out of the introduction of M Pesa in Kenya and its drive towards financial inclusion It considers the interaction between regulation and technological innovation with a particular focus on the regulatory tools institutional arrangements and government decisional processes through the examination as a whole of its regulatory capacity This is done with a view to understanding the regulatory capacity of Kenya in addressing the vulnerabilities presented by technological innovation in the financial industry for consumers after financial inclusion It also examines the way that mobile payments have been regulated by criticising the piecemeal approach that the Central Bank of Kenya has taken in addressing the legal and regulatory issues presented by mobile payments The book argues there are significant gaps in the regulatory regime of mobile banking in Kenya      **Climate Terror** Sanjay Chaturvedi, 2016-01-12 Climate Terror engages with a highly differentiated geographical politics of global warming It explores how fear inducing climate change discourses could result in new forms of dependencies domination and militarised climate security
