The Trans Pacific Partnership, China and India Amitendu Palit, 2014-06-05 The United States and 11 other countries from both sides of the Pacific are currently negotiating the Trans Pacific Partnership TPP The agreement is expected to set new benchmark for international trade through its comprehensive coverage of issues and binding regulations It is expected to eventually mature into a regional trade agreement covering the entire Asia Pacific As of now it does not include China and India the two largest emerging markets and regional economies The TPP has generated controversy for its excessive emphasis on trade issues which have remained unresolved or unaddressed at the WTO due to differences between developed and emerging markets It has also been criticized for adopting a negotiating style reflecting the US regulatory approach to international trade and also as a geo political strategy of the US for supporting its strategic rebalancing towards

Asia From both economic and geo political perspectives the TPP has various significant implications for China and India that are examined in the book This book sheds light on how China and India s entries in the TPP are mutually beneficial and how both countries can gain from the TPP by gaining preferential access to large markets and using it as an opportunity for introducing more outward oriented reforms The book also cautions that US must reconcile to the rebalancing of economic power within the grouping that will occur following the entries of China and India Otherwise the TPP and China and India might walk divergent paths and trade and regional integration in Asia Pacific may not ever converge This book will interest anyone who wishes to learn more about the TPP and its future implications and challenges and China and India s roles in global and regional trade **Asian-Pacific Rim Logistics** Peter J. Lampert, Doctor May Tan-Mullins, Daphne Chang, Giles Mohan, 2014-06-12 China's recent stepping up of relations with Africa is one of the most significant developments on the African continent for decades For some it promises an end to Africa's dependent aid relationships as the Chinese bring expertise technology and a stronger business focus But for others it is no more than a new form of imperialism This book is the first to systematically study the motivations relationships and impact of this migration It focuses not just on the Chinese migrants but also on the perceptions of and linkages to their African hosts By studying this everyday interaction we get a much richer picture of whether this is South South cooperation as political leaders would have us believe or a more complex relationship that can both compromise and encourage African development

Territorial Disputes in the South China Sea J. Huang, A. Billo, 2014-12-09 Heightened tensions in the South China Sea have raised serious concerns about the dangers of conflict in this region as a result of unresolved complex territorial disputes This volume offers detailed insights into a range of country perspectives addressing the historical legal structural regional and multilateral dimensions of these disputes Agricultural Reform in Rwanda Chris Huggins, 2017-10-15 International

observers have lauded Rwanda as an example of an African country taking control of its own development trajectory and as a market friendly destination for investment. A key component of this narrative has been an ambitious programme of agricultural reform involving private firms, NGOs and international charities. The Rwandan government claims these reforms have been a resounding success, tripling crop yields and helping to combat hunger. Chris Huggins argues, however, that Rwanda's liberal modernising image sits poorly with the regime's continuing authoritarian tendencies. Featuring in depth case studies of the effects of agricultural reform in three different regions and drawing on hundreds of interviews, Huggins shows that the much vaunted liberalization of agriculture has in fact depended on the coercion of Rwandan farmers and in many cases has had a detrimental impact on their livelihoods. With the Kagame regime now coming under increasing international scrutiny, this work provides a timely look at the impact of market friendly authoritarianism in contemporary Africa, making essential reading for students and scholars of development in the fields of sociology, anthropology, political science and economics.

Rethinking Climate Change, Conflict and Security Jan Selby, Clemens Hoffmann, 2017-10-02

Is global climate change likely to become a significant source of violent conflict and should it therefore be seen as a national security challenge? Most Northern governments, militaries, think tanks and NGOs believe so, as do many academic researchers on the grounds that increased temperatures, changing precipitation patterns and rising sea levels will worsen existing social stresses, especially within poor societies and marginal communities across Africa and Asia. This book argues otherwise. The first collection of its kind, it brings together leading scholars of Anthropology, Geography, Development Studies and International Relations to provide a series of critical analyses of mainstream thinking on the climate security nexus. It shows how policy discourse on climate conflict consistently misrepresents the causes of violence, especially by obscuring its core political dimensions. It demonstrates that quantitative research provides a flawed basis for understanding climate conflict linkages. It argues that climate security discourse is in hoc with a range of questionable military, authoritarian and developmental agendas. And it reveals that the greening of global capitalism is already having violent consequences across the global South. Climate change, the book argues, does indeed have serious conflict and security implications, but these are quite different from how they are usually imagined. This book was published as a special issue of *Geopolitics*.

Oiling the Urban Economy Franklin Obeng-Odoom, 2014-06-13. This book presents a critical analysis of the resource curse doctrine and a review of the international evidence on oil and urban development to examine the role of oil on property development and rights in West Africa's new oil metropolis, Sekondi-Takoradi, Ghana. It seeks answers to the following questions: In what ways did the city come into existence? What changes to property rights are oil prospecting, explorations and production introducing in the 21st century? How do the effects vary across different social classes and spectrums? To what extent are local and national institutions able to shape, restrain and constrain transnational oil-related accumulation and its effects on property in land, property in housing, residential leisure and commercial and property in labour? How do these processes connect with the

entire urban system in Ghana This book shows how institutions of varying degrees of power interact to govern land housing and labour in the city and analyses how efficient sustainable and equitable the outcomes of these interactions are It is a comprehensive account of the tensions and contradictions in the main sectors of the urban economy society and environment in the booming Oil City and will be of interest to urban economists development economists real estate economists Africanists and urbanists

The Unions' Response to Globalization Gary Chaison, 2014-07-08 Globalization is commonly described in trade and cultural terms but its impact on unions and collective bargaining is seldom assessed The few studies of unions and globalization are mostly collections of cases studies of how unions can work together or with other alliance partners to defend against the power of multinational corporations This book goes beyond the current research by asking how unions have tried to deal with globalization and how globalization might threaten the fundamental union mission of taking wages hours and conditions of employment out of competition The introductory chapter defines globalization and uses the case of the Detroit Three automakers GM Chrysler and Ford to show how globalization can affect employment and union size influence and relevancy The second chapter shows how unions deal globalization through collective bargaining regarding outsourcing alliances strikes and political action including lobbying and international work standards The final chapter argues that the unions

cannot continue unchanged in this age of globalization and asks what they must do to be effective and relevant
