The Use of Force in International Law Tom Ruys,Olivier Corten,Alexandra Hofer,2018-04-26 The international law on the use of force is one of the oldest branches of international law It is an area twinned with the emergence of international law as a concept in itself and which sees law and politics collide

The number of armed conflicts is equal only to the number of methodological approaches used to describe them. Many violent encounters are well known. The Kosovo Crisis in 1999 and the US led invasion of Iraq in 2003 spring easily to the minds of most scholars and academics and gain extensive coverage in this text. Other conflicts including the Belgian operation in Stanleyville and the Ethiopian Intervention in Somalia are often overlooked to our peril. Ruys and Corten's expert written text compares over sixty different instances of the use of cross border force since the adoption of the UN Charter in 1945 from all out warfare to hostile encounters between individual units targeted killings and hostage rescue operations to ask a complex question: How much authority does the power of precedent really have in the law of the use of force. Root Causes of Terrorism Tore Bjørgo, 2004-08-02 This is the most detailed account of the motivations behind terrorism. Written by a team of leading international experts it provides a sophisticated analysis of one of the most pressing issues facing the world today.

Peremptory Norms of General International Law (Jus Cogens) and the Prohibition of Terrorism Aniel Caro de Beer, 2019-02-19 Winner of the 2020 ASIL Lieber prize. In *Peremptory Norms of International Law and Terrorism: Jus Cogens and the Prohibition of Terrorism* Aniel de Beer analyses the role of these norms: jus cogens norms in the fight against terrorism. Jus cogens norms protect fundamental values of the international community: are hierarchically superior and non derogable. The author argues based on an analysis of the sources of international law that the prohibition of terrorism has become the jus cogens norm of our time. She further considers the impact of the status of the prohibition of terrorism as a jus cogens norm on other norms of international law relevant in the fight against terrorism: namely the prohibition of torture, the right to a fair trial and the prohibition of the inter state use of force. *Law at War: The Law as it Was and the Law as it Should Be* Ola Engdahl, Pål Wrange, 2009-01-31 The authors of this volume have been inspired by the scholar to which this *Liber Amicorum* is dedicated: Professor Ove Bring to look into both the past and the future of international law. Like Ove Bring they have dealt with many aspects of the law governing the use of force from arms control to human rights, international criminal law, the UN Charter and of course international humanitarian law. Like Professor Bring they have allowed themselves to draw trajectories from history and into the future and have shunned away from neither the controversial nor the speculative: be it on the Middle East, the invasion of Iraq or the independence of Kosovo. This collection brings together insights from a former UN Legal Counsel, a former Executive Chairman of UNMOVIC, present and former judges of the European Court of Justice, the International Criminal Tribunal for the former Yugoslavia and the International Tribunal for the Law of the Sea, one present and one former member of the International Law Commission as well as law professors and practitioners from all Nordic countries, Germany and Australia. Together they form a highly challenging mosaic of perspectives on topical issues like cluster munitions targeting human rights in peace operations and the purposes of sentencing in international tribunals. The volume also contains a bibliography and a presentation of Professor Bring's work.
