MPI-Based Message Passing Interface Jean-Marc Adamo,2012-12-06 Multi Threaded Object Oriented MPI Based Message Passing Interface The ARCH Library presents ARCH a library built as an extension to MPI ARCH relies on a small set of programming abstractions that allow the writing of well structured multi threaded parallel codes according to the object oriented programming style ARCH has been written with C The book describes the built in classes and illustrates their use through several template application cases in several fields of interest Distributed Algorithms global completion detection distributed process serialization Parallel Combinatorial Optimization A procedure Parallel Image Processing segmentation by region growing It shows how new application level distributed data types such as a distributed tree and a distributed graph can be derived from the built in classes A feature of interest to readers is that both the library and the application codes used for illustration purposes are available via the Internet The material can be downloaded for installation and personal parallel code development on the reader s computer system ARCH can be run on Unix Linux as well as Windows NT based platforms Current installations include the IBM SP2 the CRAY T3E the Intel Paragon PC networks under Linux or Windows NT Multi Threaded Object Oriented MPI Based Message Passing Interface The ARCH Library is aimed at scientists who need to implement parallel distributed algorithms requiring complicated local and or distributed control structures It can also benefit parallel distributed program developers who wish to write codes in the object oriented style The author has been using ARCH for several years as a medium to teach parallel and network programming Teachers can employ the library for the same purpose while students can use it for training Although ARCH has been used so far in an academic environment it will be an effective tool for professionals as well Multi Threaded Object Oriented MPI Based Message Passing Interface The ARCH Library is suitable as a secondary text for a graduate level course on Data Communications and Networks Programming Languages Algorithms and Computational Theory and Distributed Computing and as a reference for

researchers and practitioners in industry Linking the economics of water, energy, and food: A nexus modeling approach
Al-Riffai, Perrihan, Breisinger, Clemens, Mondal, Md. Hossain Alam, Ringler, Claudia, Wiebelt, Manfred, Zhu, Tingju, 2017-04-28
We use an innovative methodology to model the socioeconomic linkages between water energy and food in the East Nile Basin Based upon a theoretical nexus framework the methodology is expanded into a quantifiable modeling suite that underlies the analysis of each of three country case studies The advantages are that despite resource shortages being a challenge the modeling suite aids in devising policies and strategies that formulate these sectoral interdependencies and provide the evidence based research results necessary for their design in a way that exploits synergies existing across sectors countries and regions Al Zubari n d This paper lays out the methodology and gives an example of an application and scenarios by focusing on three countries in the East Nile Basin This methodology paper will be followed by three individual country case studies that highlight the water energy and food nexus for each Android Application Security Mu Zhang, Heng Yin, 2016-11-16 This SpringerBrief explains the emerging cyber threats that undermine Android application security It further explores the opportunity to leverage the cutting edge semantics and context aware techniques to defend against such threats including zero day Android malware deep software vulnerabilities privacy breach and insufficient security warnings in app descriptions The authors begin by introducing the background of the field explaining the general operating system programming features and security mechanisms The authors capture the semantic level behavior of mobile applications and use it to reliably detect malware variants and zero day malware Next they propose an automatic patch generation technique to detect and block dangerous information flow A bytecode rewriting technique is used to confine privacy leakage User awareness a key factor of security risks is addressed by automatically translating security related program semantics into natural language descriptions Frequent behavior mining is used to discover and compress common semantics As a result the produced descriptions are security sensitive human understandable and concise By covering the background current threats and future work in this field the brief is suitable for both professionals in industry and advanced level students working in mobile security and applications It is valuable for researchers as well
