Honor Court Sid Stark, 2021-03-08 Doctor Rowena Halley signed up to be a professor not a cop Now she may have to be judge jury and executioner as well When a student with a hijab and a strong Chechen accent confides in Rowena about a tricky sexual assault case and asks for her help Rowena can't say no again Being the only Russian professor on campus as well as the faculty member students go to for help has its advantages But the disadvantages can be deadly After a tragic incident last semester Rowena is trying to get her career back on track not to mention her love life With her Russian ex fianc Dima supposedly out of the picture Rowena is hoping to build a future across the country in California with her American boyfriend Alex But the past has a nasty habit of coming back to haunt you When Aishat Aslanbekova comes to Rowena with her suspicions that she was drugged and assaulted at a frat party

Rowena finds herself forced to confront her own demons as well as Aishat's. With Aishat making accusations against the college's star quarterback and posterchild for diversity Rowena doesn't know which will be more heartbreaking: finding out that Aishat is lying or finding out she's telling the truth. Either way, both Aishat and the men she says assaulted her are in danger of an honor killing at the hands of Aishat's family. Rowena believes in non-violence. Non-violence may not believe in her. Content warning: Along with the kind of adult language you should expect from mouthy undergrads and battle-scarred Iraq vets, this book also contains a serious discussion of racism, Islamophobia, economic injustice, PTSD, and sexual assault. You've been warned.

An Introduction to Reliability and Maintainability Engineering Charles E. Ebeling, 2019-04-12 Many books on reliability focus on either modeling or statistical analysis and require an extensive background in probability and statistics. Continuing its tradition of excellence as an introductory text for those with limited formal education in the subject, this classroom-tested book introduces the necessary concepts in probability and statistics within the context of their application to reliability. The Third Edition adds brief discussions of the Anderson-Darling test, the Cox proportionate hazards model, the Accelerated Failure Time model, and Monte Carlo simulation. Over 80 new end-of-chapter exercises have been added, as well as solutions to all odd-numbered exercises. Moreover, Excel workbooks are available for download, saving students from performing numerous tedious calculations and allowing them to focus on reliability concepts. Ebeling has created an exceptional text that enables readers to learn how to analyze failure repair data and derive appropriate models for reliability and maintainability, as well as apply those models to all levels of design.
