Brunsma, Keri E. Lyall Smith, Brian Gran, 2016-09-07 How do people work together to advance human rights Do people form groups to prevent human rights from being enforced Why In what ways do circumstances matter to the work of individuals collectively working to shape human rights practices Human society is made of individuals within contexts tectonic plates not of the earth's crust but of groups and individuals who scrape and shift as we bump along competing for scarce resources and getting along These movements large and small are the products of actions individuals take in communities within families and legal structures These individuals are able to live longer yet continue to remain vulnerable to dangers arising from the environment substances struggles for power and a failure to understand that in most ways we are the same as our neighbors Yet it is because we live together in layers of diverse communities that we want our ability to speak to be unhindered by others use spirituality to help us understand ourselves and others possess a space and objects that are ours alone and join with groups that share our values and interests including circumstances where we do not know who our fellow neighbor is For this reason sociologists have identified the importance of movements and change in human societies When we collaborate in groups individuals can change the contours of their daily lives Within this book you will find the building blocks for human rights in our communities To understand why sometimes we enjoy human rights and other times we experience vulnerability and risk sociologists seek to understand the individual within her context Bringing together prominent sociologists to grapple with these questions *Movements for Human Rights Locally and Globally* offers insights into the ways that people move for and against human rights **The Asian Yearbook of Human Rights and Humanitarian Law** Ayesha Shahid, Meryl

Arab Water Security Hussein A. Amery, 2015-07-02 This book explores the national security implications of the Arab Gulf states' reliance on desalination plants and their related infrastructure. It provides the first systematic and comprehensive discussion of current and future threats to the supply of freshwater from a desalination plant, including actual and virtual attacks by terrorists, mechanical failure, contamination, sabotage by aggrieved workers, and attacks relating to regional conflicts, as well as their vulnerability to natural disasters. It also provides a detailed analysis of the effects of a potential disruption to the water supply and proposes possible measures, both political and technological, that can be used to increase resilience to these threats. *Arab Water Security* is a valuable reference for researchers and graduate students as well as for policy makers and professionals interested in water security, natural resources, and environmental terrorism.

How are human rights protected in Islam, the Middle East? What is Islamic constitutionalism? How does Islamic law provide for a democratic system of government? The book argues that the development of the rule of law, democracy, respect for human rights should be a process of interaction, integration on a global scale. In addition, it stresses that the integration of previously closed societies into the process of globalisation must take into account the indigenous traditions already existing in such societies, the extent to which they will contribute to benefit from the process as a whole.
