Robo Sapiens Japanicus Jennifer Robertson, 2018 Japan is arguably the first postindustrial society to embrace the prospect of human robot coexistence Over the past decade Japanese humanoid robots designed for use in homes hospitals offices and schools have become celebrated in mass and social media throughout the world In Robo sapiens japanicus Jennifer Robertson casts a critical eye on press releases and public relations videos that misrepresent robots as being as versatile and agile as their science fiction counterparts An ethnography and sociocultural history of governmental and academic discourse of human robot relations in Japan this book explores how actual robots humanoids androids and animaloids are imagineered in ways that reinforce the conventional sex gender system and political economic status quo In addition Robertson interrogates the notion of human exceptionalism as she considers whether civil rights should be granted to robots Similarly she juxtaposes how robots and robotic exoskeletons reinforce a conception of the normal body with a deconstruction of the much invoked Theory of the Uncanny Valley
