Autonomy and Law Jan-R. Sieckmann, 2025-08-12 This book defends the idea of autonomy as the balancing of normative arguments which captures the essential feature of autonomous judgement as being simultaneously free and normatively bound However this approach runs counter to the dominant view of arguments as propositions and to Kantian notions of autonomy Here it is applied to three core dimensions of law law as legal system as legal practice and as normative judgement leading to specific views of legal validity legal interpretation and the necessary content of law in the form of human rights principles Lastly the autonomous reasoning perspective is applied to conflicts of law with morality and with competing legal systems *Study Guide to Accompany Hurley's A Concise Introduction to Logic, Third Edition* Robert W. assimilated by the various networks of earthly power and profit The book begins with Chaucer's treatment of received versions of faith ethics and the Church and moves via St Thomas Ockham Nicholas Love Gower the Gawain poet and Langland who pursues the issues with particular intensity and focus to Wyclif's construal of Christian discipleship in relation to his projected reform of the Church Interdisciplinary in approach the book will be of interest to all those studying late medieval Christianity and literature DAVID AERS is James B Duke Professor of English and Professor of Historical Theology at Duke University

Representation in Congress Kim Quaile Hill, Soren Jordan, Patricia A. Hurley, 2015-07-02 Representation in Congress provides a theory of dyadic policy representation intended to account for when belief sharing delegate responsible party trustee and party elite led models of representational linkage arise on specific policy issues The book also presents empirical tests of most of the fundamental predictions for when such alternative models appear and it presents tests of novel implications of the theory about other aspects of legislative behavior Some of the latter tests resolve contradictory findings in the relevant existing literature such as whether and how electoral marginality affects representation whether roll call vote extremism affects the re-election of incumbents and what in fact is the representational behavior of switched seat legislators All of the empirical tests provide evidence for the theory Indeed the full set of empirical tests provides evidence for the causal effects anticipated by the theory and much of the causal process behind those effects

Twin Peaks and Philosophy Richard Greene, Rachel Robison-Greene, 2018-08-07 2017 saw the triumphant return of the weird and haunting TV show *Twin Peaks* with most of the original cast after a gap of twenty five years *Twin Peaks and Philosophy* finally answers that puzzling question What is *Twin Peaks* really about *Twin Peaks* is about evil in various forms and poses the question What's the worst kind of evil Can the

everyday evil of humans in a small mountain town ever be as evil as the evil of alien supernatural beings Or is the evil of non humans actually less threatening because it s so strange and unaccountable And does the influence of uncanny forces somehow excuse the crimes committed by regular folks Some Twin Peaks characters try to confine evil by sticking to their own moral code as in the case of Albert Rosenfeld who refuses to disguise his feelings and upsets everyone by his forthright honesty Twin Peaks is about responsibility both legal and moral Who is really responsible for the death of Laura Palmer and other murder victims Although Leland has been revealed as Laura s actual killer the show suggests that no one in town was without some responsibility And was Leland even guilty at all if he was not in control of his own mind or body Twin Peaks is about the quest for self knowledge and the dangers of that quest as Agent Cooper keeps learning something new about himself as well as about the troubled townspeople The Buddhist Cooper has to confront his own shadow side culminating in the rite of passage at the Black Lodge at the end of Season Two Twin Peaks is about madness sanity the borderline between them and the necessity of some madness to make sense of sanity The outwardly super normal if somewhat eccentric Agent Dale Cooper is the inspired deranged and dedicated shaman who seeks the truth by coming to terms with the reality of unreason partly through his dreams and partly through his existential encounters with giants logs outer space and other unexpected sources Cooper challenges official law enforcement s over reliance on science Twin Peaks is about the imagination run wild moving from metaphysics to pataphysics the discipline invented by Alfred Jarry which probes the assumption that anything can happen and discovers the laws governing events which constitute exceptions to all laws
