the amateur be alarmed about the expense of a house suitable for Orchids If his collection at first is small any kind or form of house if sufficiently heated will with judicious care grow them on till a larger house is needed but where expense is no object then a proper house should be put up for them Experience has proved that a span roofed house is the best form Now as these plants mostly grow on trees in their native country there they enjoy a large amount of light Hence we should study to give them as much light as we possibly can in our comparatively speaking dark climate About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
