5329 EIC N A Metal Forming Handbook Schuler GmbH,2012-12-06 Following the long tradition of the Schuler Company the Metal Forming Handbook presents the scientific fundamentals of metal forming technology in a way which is both compact and easily understood Thus this book makes the theory and practice of this field accessible to teaching and practical implementation The first Schuler Metal Forming Handbook was published in 1930 The last edition of 1966 already revised four times was translated into a number of languages and met with resounding approval around the globe Over the last 30 years the field of forming technology has been radically changed by a number of innovations New forming techniques and extended product design possibilities have been developed and introduced This Metal Forming Handbook has been fundamentally revised to take account of these technological changes It is both a text book and a reference work whose initial chapters are concerned to provide a survey of the fundamental processes of forming technology and press design The book then goes on to provide an in depth study of the major fields of sheet metal forming cutting hydroforming and solid forming A large number of relevant calculations offers state of the art solutions in the field of metal forming technology In presenting technical explanations particular emphasis was placed on easily understandable graphic visualization All illustrations and diagrams were compiled using a standardized system of functionally oriented color codes with a view to aiding the reader's understanding

New Technologies, Development and Application IV Isak Karabegović,2021-05-11 This book features papers focusing on the implementation of new and future technologies which were presented at the International Conference on New Technologies Development and Application held at the Academy of Science and Arts of Bosnia and Herzegovina in Sarajevo on June 24-26 2021 It covers a wide range of future technologies and technical disciplines including complex systems such as Industry 4.0 patents in industry 4.0 robotics mechatronics systems automation manufacturing cyber physical and autonomous systems sensors networks control energy renewable energy sources automotive and biological systems vehicular networking and connected vehicles effectiveness and logistics systems smart grids nonlinear systems power social and economic systems education and IoT The book New Technologies Development and Application III is oriented toward Fourth Industrial Revolution Industry 4.0 implementation which improves many aspects of human life in all segments and leads to changes in business paradigms and production models Further new business methods are emerging and transforming production systems transport delivery and consumption which need to be monitored and implemented by every company involved in the global market
