Carbon Dioxide to Chemicals and Fuels M. Aulice Scibioh, B. Viswanathan, 2018-01-02 Carbon Dioxide to Chemicals and Fuels provides a snapshot of the present status of this rapidly growing field examining ongoing breakthroughs in research and development motivations innovations and their respective impacts and perspectives It also covers in detail the existing technical barriers to achieving key goals in this area This book details the various methods both currently available and potential for conversion of CO₂ into fuels and chemicals With explanation of concepts and their applications Carbon Dioxide to Chemicals and Fuels offers an interdisciplinary approach that draws on and clarifies the most recent research trends Explains the fundamental aspects of CO₂ utilization Provides recent developments in CO₂ utilization for the production of chemicals Answers the questions surrounding why some processes have not commercialized Discusses and analyses in detail many available catalytic conversion methods Reservoir Development M. Rafiqul Islam, 2021-12-04 Sustainable Oil and Gas Development Series Reservoir Development delivers research materials and emerging technologies that conform sustainability in today's reservoirs Starting with a status of technologies available the reference describes sustainability as it applies to fracturing fluids particularly within unconventional reservoirs Basement reservoirs are discussed along with non energy applications of fluids Sustainability considerations for reserve predication are covered followed by risk analysis and scaling guidelines for further field development Rounding out with conclusions and remaining challenges Sustainable Oil and Gas Development Series Reservoir Development gives today and future petroleum engineers a focused and balanced path to strengthen sustainability practices Gain insight to more environmentally friendly protocols for both unconventional and basement reservoirs including non energy applications of reservoir fluids Determine more accurate reserves and keep budgets in line while focusing on emission reduction Learn from a well known author with extensive experience in both academia and industry Tertiary Deep-Marine Reservoirs of the North Sea Region T. McKie, P.T.S. Rose, A.J. Hartley, D.W. Jones, T.L. Armstrong, 2015-11-02 Discovery of the Arbroath Montrose and Forties fields initiated intensive exploration of the Tertiary deep marine play in the North Sea region Subsequent discoveries demonstrated the success of this play and the geological diversity of the depositional systems The play is now mature and in many areas the remaining exploration potential is likely to be dominated by small subtle traps with a major component of stratigraphic trapping Economically marginal discoveries need an in depth understanding of subsurface uncertainty to mitigate risk with limited appraisal wells Mature fields require detailed geological understanding in the search for the remaining oil This volume focuses on the regional depositional setting of these deep marine systems providing a stratigraphic and palaeogeographical context for exploration and development case histories that outline the challenges of producing from these reservoirs The fields are arranged around the production life cycle describing the changing needs of geological models as the flow of static and dynamic data refines geological understanding and defines the nature of new opportunities as fields
