Gompper,2014 This edited volume adopts a global perspective to review how dogs interact with wildlife how humans perceive these interactions the potential importance of dog wildlife interactions and the scope of the problems Landscapes of Fear Yi-Fu Tuan,2013-01-02 To be human is to experience fear but what is it exactly that makes us fearful Here is one geographer s striking exploration of our landscapes of fear as they change throughout our lives and have changed throughout history Yi fu Tuan investigates landscapes of the natural environment which are threatening and landscapes filled with the dark imageries of the mind fears of drought flood famine and disease shared by all members of a community and fears of the particular ghosts which haunt the individual imagination In this lucidly written ground breaking survey Professor Tuan delves into many cultures and reaches back into our prehistory to discover what is universal and what is particular in our inheritance of fear Starting with fear in animals he raises and explores a variety of questions What is specifically human about fear Is there or has there ever been a fearless society Professor Tuan examines the most specific forms fear takes in the mind of the child among hunters and agriculturists inside the walls of a medieval Chinese city among Navaho Indians and American immigrants He explores the ways in which authorities create landscapes of terror to instill fear in their own populations and he probes that most basic of all contradictions between the need for human security and the fear of human nature Professor Tuan particularly emphasizes how in coping with fears of enemies strangers the insane wolves wind witches mountains dragons rain or the terror that the universe itself might crumble humans respond adventurously by creating shelters ranging from fairy tales to cosmological myths We watch as human beings continually draw and redraw their circles of safety never feeling entirely at peace within them **Mean Genes** Terry Burnham,Jay Phelan,2012-10-02 Short sassy and bold Mean Genes uses a Darwinian lens to examine the issues that most deeply affect our lives body image money addiction violence and the endless search for happiness love and fidelity But Burnham and Phelan don t simply describe the connections between our genes and our behavior they also outline steps that we can take to tame our primal instincts and so improve the quality of our lives Why do we want and do so many things that are bad for us We vow to lose those extra five pounds put more money in the bank and mend neglected relationships but our attempts often end in failure Mean Genes reveals that struggles for self improvement

are in fact battles against our own genes genes that helped our cavewoman and caveman ancestors flourish but that are selfish and out of place in the modern world Why do we like junk food more than fruit Why is the road to romance so rocky Why is happiness so elusive What drives us into debt An investigation into the biological nature of temptation and the struggle for control Mean Genes answers these and other fundamental questions about human nature while giving us an edge to lead more satisfying lives
