Marek Tamm, Laurent Olivier, 2019-08-22 Is time out of joint? For the past two centuries, the dominant Western time regime has been future-oriented and based on the linear, progressive, and homogeneous concept of time. Over the last few decades, there has been a shift towards a new, present-oriented regime or presentism, made up of multiple and percolating temporalities. *Rethinking Historical Time* engages with this change of paradigm, providing a timely overview of cutting-edge interdisciplinary approaches to this new temporal condition. Marek Tamm and Laurent Olivier have brought together an international team of scholars working in history, anthropology, archaeology, geography, philosophy, literature, and visual studies to rethink the epistemological consequences of presentism for the study of the past and to discuss critically the traditional assumptions that underpin research on historical time. Beginning with an analysis of presentism, the

contributors move on to explore in historical and critical terms the idea of multiple temporalities before presenting a series of case studies on the variability of different forms of time in contemporary material culture *Layout, Making it Fit* Carolyn Knight, Jessica Glaser, 2003 Finding the right balance between content and space is a challenge every graphic designer faces The cookie cutter templates most layout books offer don't help because every project has a different content to space ratio Finally here is a book that gets to the heart of challenging layout design It offers general techniques for working with varying quantities of content and shows how designers can apply these techniques in their own work The book focuses on the two most difficult layout issues compacting a high volume of content onto a small area while maintaining beauty and readability and applying a small volume of content to a large space without making it look bare From posters to logos and magazines to book covers two veteran design consultants examine more than 150 projects and illustrate the methodologies and solutions that made each work This invaluable resource reveals how to make content shine in any space *Bookshelf* Lydia Pyne, 2016-01-28 Object Lessons is a series of short beautifully designed books about the hidden lives of ordinary things Every shelf is different and every bookshelf tells a different story One bookshelf can creak with character in a bohemian coffee shop and another can groan with gravitas in the Library of Congress Writer and historian Lydia Pyne finds bookshelves to be holders not just of books but of so many other things values vibes and verbs that can be contained and displayed in the buildings and rooms of contemporary human existence With a shrewd eye toward this particular moment in the history of books Pyne takes the reader on a tour of the bookshelf that leads critically to this juncture amid rumors of the death of book culture why is the life of the bookshelf in full bloom Object Lessons is published in partnership with an essay series in The Atlantic *Business and Environmental Sustainability* Sigrun M.
