The Whole Building Handbook Varis Bokalders, Maria Block, 2010-02-09 The Whole Building Handbook is a compendium of all the issues and strategies that architects need to understand to design and construct sustainable buildings for a sustainable society The authors move beyond the current definition of sustainability in architecture which tends to focus on energy efficiency to include guidance for architecture that promotes social cohesion personal health renewable energy sources water and waste recycling systems permaculture energy conservation and crucially buildings in relation to their place The authors offer a holistic approach to sustainable architecture and authoritative technical advice on How to design and construct healthy buildings through choosing suitable materials healthy service systems and designing a healthy and comfortable indoor climate including solutions for avoiding problems with moisture radon and noise as well as how to facilitate cleaning and maintenance How to design and construct buildings that use resources efficiently where heating and cooling needs and electricity use is minimized and water saving technologies and garbage recycling technologies are used How to close organic waste sewage heat and energy cycles For example how to design a sewage system that recycles nutrients Includes a section on adaptation of buildings to local conditions looking at how a site must be studied with respect to nature climate and community structure as well as human activities The result is a comprehensive thoroughly illustrated and carefully structured textbook and reference

Decarbonising the Built Environment Peter Newton, Deo Prasad, Alistair Sproul, Stephen White, 2019-06-07 This book focuses on the challenge that Australia faces in transitioning to renewable energy and regenerating its cities via a transformation of its built environment Both are necessary conditions for low carbon living in the 21st century This is a global challenge represented by the United Nations Sustainable Development Goals and the IPCC's Climate Change program and its focus on mitigation and adaptation All nations must make significant contributions to this transformation This book highlights the new knowledge and innovation that has emerged from research projects undertaken in the Cooperative Research Centre for Low Carbon Living between 2012 and 2019 an initiative of the Australian Government's Department of Industry Science and Technology that is tasked with responding to the UN challenges Four principal transition pathways were central to the CRC and provide the thematic structure to this volume They focus on technology buildings precinct and city design and human behaviour and their interactions

The Urban Section Robert Mantho, 2014-09-25 The design of

streets and the connections between streets of different character is the most important task for architects and urbanists working in an urban context. Considered at two distinct spatial scales that of the individual street the Street Section and the complex of city streets the City Transect Urban Section identifies a range of generic street types and their success or otherwise in responding to climatic cultural traditional morphological social and economic well being. Using comparative studies a profile of best practice in street and city design is identified showing methodologies in both the analysis of and design for successful streets and public places place making. In uniquely dealing with both the historic and contemporary description and analysis of urban streets around the world the work is of both academic and professional interest to architects urban planners and designers highway engineers landscape and urban design advisers in both the public and private sectors students amenity and civic societies city authorities and government agencies.

Architectural Design Portable Handbook Pressman, 2001-02-22 Architect's Portable Handbook by Pat Guthrie initiated the Portable Handbook series and has been very successful. It is essentially a technical guide organized by CSI MasterFormat it covers key code and standard information for building elements such as roofs and walls and key materials such as wood concrete and steel. Architect's Portable Design Handbook by contrast puts this essential information into context. It shows the architect how to work with clients compile information evaluate the site explore design alternatives evaluate user needs work with CAD and other programs integrate other engineering disciplines such as HVAC into a design and make presentations. Together these two invaluable guides are all the architect needs to do architecture.

Soft City David Sim, 2019-08-20 Imagine waking up to the gentle noises of the city and moving through your day with complete confidence that you will get where you need to go quickly and efficiently. Soft City is about ease and comfort where density has a human dimension adapting to our ever changing needs nurturing relationships and accommodating the pleasures of everyday life. How do we move from the current reality in most cities separated uses and lengthy commutes in single occupancy vehicles that drain human environmental and community resources to support a soft city approach. In *Soft City* David Sim partner and creative director at Gehl shows how this is possible presenting ideas and graphic examples from around the globe. He draws from his vast design experience to make a case for a dense and diverse built environment at a human scale which he presents through a series of observations of older and newer places and a range of simple built phenomena some traditional and some totally new inventions. Sim shows that increasing density is not enough. The soft city must consider the organization and layout of the built environment for more fluid movement and comfort a diversity of building types and thoughtful design to ensure a sustainable urban environment and society. *Soft City* begins with the big ideas of happiness and quality of life and then shows how they are tied

to the way we live The heart of the book is highly visual and shows the building blocks for neighborhoods building types and their organization and orientation how we can get along as we get around a city and living with the weather As every citizen deals with the reality of a changing climate Soft City explores how the built environment can adapt and respond Soft City offers inspiration ideas and guidance for anyone interested in city building Sim shows how to make any city more efficient more livable and better connected to the environment Moody's Manual of Investments, American and Foreign; Banks, Insurance Companies, Investment Trusts, Real Estate, Finance and Credit Companies ,1944
