also the difficulties of building small businesses when real or threatened violence can disrupt business growth cycles and economic security. Alongside establishing secure institutions, building a secure economy is rightly seen as the best way for conflict-torn regions to establish a peaceful future. But current agricultural entrepreneurship training and development starts from an assumption of peace, meaning that it is not always fit for purpose. The result is sub-optimal program design and inefficient use of resources. A product of a collaboration of experts in the fields of agri-business, agricultural marketing and international development, this book gives officials and agencies developing entrepreneurship programs the practical, real-life examples they need.
