

N30

Supervisory Controller

N30 Supervisory Controller

Description

The N30 Supervisory Controller is designed to monitor and supervise Heating, Ventilating, and Air Conditioning (HVAC) equipment as well as lighting, security, and building access. The N30 efficiently supervises the networking of Application Specific Controllers (ASCs) and provides building automation features including time scheduling, alarm management, controller data exchange, energy management, and remote communications. Equipment is operated at peak efficiency while maintaining optimum occupant comfort.

Facility personnel can review the system status and modify control parameters for the N30 Supervisory Controller and its associated ASCs using a VT100 Terminal, VT100 Terminal Emulator, M-Series Workstation, or the Local Display Terminal (LDT).

Features

- built-in energy management features such as Demand Limiting and Load Rolling (DLR) and Optimal Start (OST).
- network-wide interlocking to support integrated control between distributed controllers.
- peer-to-peer communication (with network card) to provide direct communication between N30s using BACnet/IP protocol.
- dial in - dial out to allow access to/from remote sites.
- local user interface such as Local Display Terminal or VT100 Terminal allows local access to controller data and adjustment of operating conditions.
- single seat user interface, M-Series Workstation, allows operator to review entire system.
- password protection to allow system access to be tailored to the level needed by various operators.
