

Getting Codes from the TVG3301

If you need to find out which three-digit code is operating your TV, VCR or Cable Box after your component is set up, use this procedure. For example, to obtain your TV code from the TVG3301:

- 1 Press the **TV** key and release. Press and hold **SETUP** until the TVG3301's red light blinks twice, then release **SETUP**.
- 2 Press 9 - 9 - 0.
- 3 For the first digit of your three-digit code, press 1 and count the number of times the red light (LED) blinks on the TVG3301. If the light does not blink when you press the number 1, the digit is zero.
- 4 For the second digit, press 2 and count the number of times the red light (LED) blinks on the TVG3301. If the light does not blink when you press the number 2, the digit is zero.
- 5 For the third and final digit, press 3 and count the number of times the red light (LED) blinks on the TVG3301. If the light does not blink when you press the number 3, the digit is zero. Now you have your three-digit code.

Notes: To find the code for your other components, repeat Steps 1 through 5, only substitute the appropriate device key (VCR or CABLE) for the component you wish to get the code for.

Write down the three-digit code for future reference.

Trouble Shooting

Problem:	Solution:
Red light not blinking when you press a key?	Replace the batteries with four (4) new AAA alkaline batteries.
The red light blinks when you press a key but you receive no response from your home entertainment component?	Make sure you are aiming your TVG3301 at your home entertainment component and that you are within 15 feet of the component you are trying to operate before using your remote.

Trouble Shooting

Problem:	Solution:
The TVG3301 does not operate your home entertainment components or is not performing commands properly?	Try all of the codes listed for your brand of home entertainment equipment in the "Set-Up Codes" section. Some set-up codes may allow for partial functionality, however, only one set-up code will operate your home entertainment equipment correctly. Make sure that all of the components you are setting up are able to be operated with an infrared remote control.
Problems programming a TV/VCR combination?	Use the VCR set-up codes for your brand of TV/VCR combination. Some combo units may require both a TV code to control the volume and a VCR code to control the other functions.
VCR is not recording?	As a safety feature on the TVG3301, you must press the REC (Record) key twice.
No volume in the CABLE mode or for a 2nd TV or a TV/VCR Combination?	Press and hold SETUP until the TVG3301's red light blinks twice. Release SETUP and enter 9-9-3 followed by VOL ▲ (Volume Up).
The TVG3301 is not performing Volume Up and Down and Mute when in the VCR mode?	Press and hold SETUP until the TVG3301's red light blinks twice. Release SETUP and enter 9-9-3 followed by the desired device key (TV or VCR only if the VCR has volume control) for the component that you would like to control the volume.
CH ▲ and ▼ Channel Up and Down) as well as PREV CH (Previous Channel) not working for your RCA TV?	Due to RCA design (1983-1987), only the original remote control will operate these functions.
Problems changing channels?	If your original remote control required an ENTER keystroke after entering a channel digit when changing channels, press the ENTER key on the TVG3301 after you enter the channel number.
Keypad scrambled?	Press and hold SETUP until the TVG3301's red light blinks twice. Release SETUP and enter 9-9-9.
