Precision agriculture '23 John V. Stafford, 2023-08-14 Precision agriculture is a reality in agriculture and is playing a key role as the industry comes to terms with the environment. Market forces, quality requirements, traceability, vehicle guidance, and crop management. Sensors now in use in agriculture are generating Big Data, leading to the use of machine learning and AI, an increasing challenge for agriculture. Research continues to be necessary and needs to be reported and disseminated to a wide audience. These edited proceedings contain peer-reviewed papers presented at the 14th European Conference on Precision Agriculture held in Bologna, Italy. The papers reflect the wide range of disciplines that impinge on precision agriculture: technology, crop science, soil science, agronomy, information technology, decision support, remote sensing, data analysis, and others. The broad range of research topics reported will be a valuable resource for researchers, advisors, teachers, and professionals in agriculture long after the conference has finished. **Occupational Therapy for People Experiencing Illness, Injury or Impairment E-Book (previously entitled Occupational Therapy and Physical Dysfunction)** Michael Curtin, Mary Egan, Jo Adams, 2016-12-16 The sixth edition of this classic book remains a key text for occupational therapists supporting their practice in working with people with physical impairments, stimulating reflection on the knowledge, skills, and attitudes which inform practice, and encouraging the development of occupation-focused practice. Within this book, the editors have addressed the call by leaders within the profession to ensure that an occupational perspective shapes the skills and strategies used within occupational therapy practice. Rather than focusing on discrete diagnostic categories, the book presents a range of strategies that, with the use of professional reasoning, can be transferred across practice settings. The new editors have radically updated the book in response to the numerous internal and external influences on the profession, illustrating how an occupational perspective underpins occupational therapy practice. A global outlook is intrinsic to this edition of the book, as demonstrated by the large

number of contributors recruited from across the world Covers everything the student needs within the physical disorders part of their course Links theory of principles to practice and management Written and edited by a team of internationally experienced OT teachers clinicians and managers Gives key references and further reading lists for more detailed study Written within a framework of lifespan development in line with current teaching and practice Includes practice scenarios and case studies Focuses on strategies New title echoes the contemporary strength based and occupation focused nature of occupational therapy practice which involves working with people and not medical conditions and diagnoses Content and structure reviewed and shaped by an international panel of students new graduates 22 additional chapters 100 expert international contributors Evolve Resources evolve elsevier com Curtin OT contains 3 bonus interactive practice stories with reflective videos 360 MCQs 200 reflective questions 250 downloadable images Critical discussion of the ICF in the context of promoting occupation and participation Pedagogical features summaries key points and multiple choice and short answer reflective questions
