 of Teachers Using TEDS-M Data* Maria Teresa Tatto, Michael C. Rodriguez, Wendy M. Smith, Mark D. Reckase, Kiril
 Bankov, 2018-08-16 This book uses the publicly available TEDS M data to answer such questions as How does teacher
 education contribute to the learning outcomes of future teachers Are there programs that are more successful than others in
 helping teachers learn to teach mathematics How does the local and national policy environment contribute to teacher
 education outcomes It invites readers to explore these questions across a large number of international settings The
 importance of preparing future mathematics teachers has become a priority across many nations Across the globe nations
 have allocated resources and expertise to this endeavour Yet in spite of the importance accorded to teacher education not
 much is known about different approaches to preparing knowledgeable teachers and whether these approaches do in fact
 achieve their purpose The Mathematics Teacher Education and Development Study TEDS M is the first and to date the only
 cross national study using scientific and representative samples to provide empirical data on the knowledge that future
 mathematics teachers of primary and secondary school acquire in their teacher education programs The study addresses the
 central importance of teacher knowledge in learning to teach mathematics by examining variation in the nature and influence
 of teacher education programs within and across countries The study collected data on teacher education programs structure
 curriculum and opportunities to learn on teacher educators characteristics and beliefs and on future mathematics teachers
 individual characteristics beliefs and mathematics and pedagogical knowledge across 17 countries providing a unique
 opportunity to explore enduring questions in the field
