largest surviving wild land mammal today the red deer the largest contemporary land carnivore the badger and another 65 or so extant wild mammals included about a quarter of the wild mammals that have been introduced in the last 15 000 years The contemporary fauna however is largely dominated by domestic animals such as cattle sheep pigs and humans This book explores the fate of the large extinct species as well as how why and when the introduced species appeared *Quaternary of South-West England* S. Campbell, C.O. Hunt, James D. Scourse, D.H. Keen, N. Stephens, 2012-12-06

STRUCTURE OF THE VOLUME AND TERMINOLOGY USED This book contains scientific descriptions of 63 localities Figure A of at least national importance for Quaternary geology geomorphology and environmental change in South West England These sites were selected by the Geological Conservation Review and are accordingly designated GCR sites Chapter 1 provides an introduction to the Quaternary Chapter 2 synthesizes the geomorphological development and Quaternary history of the region and outlines the principles involved in site selection The individual GCR site descriptions form the core of the book In the following chapters sites are arranged and described in broad geographic areas and by research topic This is necessitated by the widely disparate nature of the field evidence in South West England sites demonstrating the full range of Quaternary and geomorphological features are not evenly and conveniently dispersed throughout the region and some areas have significant gaps Neither do the individual chapters contain sites that necessarily equate with particular site selection networks Rather the chosen chapter headings provide the least repetitive means of describing the sites and background material Where possible a chronological approach from oldest to youngest has been used to describe sites within a given chapter Again this approach is not always possible and a group of sites may show variations on landform or Stratigraphic evidence broadly within one major time interval or chronostratigraphic stage inevitably there are many overlaps

Geological Highlights of the West Country W. A. MacFadyen, A. W. G. Kingsbury, 1970 Owls, Caves and Fossils Peter Andrews, 1990-08-30 *Owls Caves and Fossils* is the first comprehensive fully illustrated account of small mammal taphonomy The study of small mammal remains has previously been neglected in favor of such large mammals as elephants bovids and carnivores and Andrews remedies this deficiency by analyzing the taphonomic processes significant in the preservation of small mammal fauna in caves

Notes & Queries for Somerset and Dorset, 1936 Caves Tony Waltham, 1974 Inquires into methods and techniques of cave exploration mechanisms and processes of cave formation ornamentation and deposits historical uses of caves and the animal life of caves *Bat Roosts in Rock* Bat Rock Habitat Key, 2021-11-23 This guide provides descriptions of when the bat species resident in Britain and Ireland use natural and human made rock habitats how they use them and the environments each species occupies therein For the first time it brings together findings from historical scientific investigations useful photographic accounts and open access biological records along with a rich seam of new data all in a practical and user friendly structure The book encompasses Descriptions of the features that a climber caver or professional ecologist might encounter on and in rock habitats where bats roost Recording

criteria for both the physical and environmental attributes of different features and situations Identification of suitability thresholds against which the recorded information can be compared to assess the likelihood that a specific feature might be exploited by a particular bat species Suggestions for how to avoid mistakes and difficulties when performing a survey The intention is that using this book will help generate standardised biological records which can feed into the fully accessible online database at www.batrockhabitatkey.co.uk These data will be analysed to search for patterns that can increase the confidence in the suitability thresholds and help build roost features that deliver the environment each species really needs As well as offering many new insights this book allows the reader to participate in cutting edge research
