Evolution Theory Section 13 Review

Charles Crawford, Dennis L. Krebs

Evolution Theory Section 13 Review:

Handbook of Evolutionary Psychology Charles Crawford, Dennis L. Krebs, 2013-03-07 Evolutionary psychology is concerned with the adaptive problems early humans faced in ancestral human environments the nature of psychological mechanisms natural selection shaped to deal with those ancient problems and the ability of the resulting evolved psychological mechanisms to deal with the problems people face in the modern world Evolutionary psychology is currently advancing our understanding of altruism moral behavior family violence sexual aggression warfare aesthetics the nature of language and gender differences in mate choice and perception It is helping us understand the relationship between cognitive science developmental psychology behavior genetics personality and social psychology Foundations of Evolutionary Psychology provides an up to date review of the ideas issues and applications of contemporary evolutionary psychology It is suitable for senior undergraduates first year graduate students or professionals who wish to become conversant with the major issues currently shaping the emergence of this dynamic new field It will be interesting to psychologists cognitive scientists and anyone using new developments in the theory of evolution to gain new insights into human behavior

Adaptive Origins Peter LaFrenière, 2011-01-07 In this text students are invited to rethink psychology by grounding it in the natural sciences with the understanding that evolutionary and developmental processes work together with culture to solve problems of human adaptation These processes are cast as interdependent Development cannot be understood except in the light of evolutionary theory and the best proof of evolution is the fact of development For students of evolutionary psychology all the central topics such as evolved mental modules for theory of mind or language require an understanding of the developmental processes that lead to their expression Genes as important as they are are never the whole story The role of biological factors is explored in chapters outlining evolution development genetics human origins hormones and the brain Then the integrative value of this evolutionary developmental vision in understanding key topics in psychology is illustrated by applying it to traditional area of inquiry including infancy and attachment emotions and their expression social relations with peers cognitive and language development sex differences courtship and mating violence and aggression and cooperation and competition
