International Practices to Promote Budget Literacy Harika Masud, Helene

Pfeil, Sanjay Agarwal, Alfredo Gonzalez Brisenio, 2017-08-09 Budget literacy is defined as the ability to read decipher and understand public budgets to enable and enhance meaningful citizen participation in the budget process It is comprised of two main parts i a technical understanding of public budgets including familiarity with government spending tax rates and public debt and ii the ability to engage in the budget process comprising of practical knowledge on day to day issues as well as an elementary understanding of the economic social and political implications of budget policies the stakeholders involved and when and how to provide inputs during the annual budget cycle Given that no international standards or guidelines have been established for budget literacy education to date this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries The underlying presumption is that when supply side actors in the budget process governments simplify and disseminate budget information for demand side actors citizens this information will then be used by citizens to provide feedback on the budget However since citizens are often insufficiently informed about public budgets to constructively participate in budget processes one way to empower them and to remedy the problem of budget illiteracy is to provide budget literacy education in schools to youth helping them evolve into civic minded adults with the essential knowledge needed for analyzing their government's fiscal policy objectives and measures and the confidence and sense of social responsibility to participate in the oversight of public resources This book elaborates on approaches learning outcomes pedagogical strategies and assessment approaches for budget literacy education and presents lessons that are relevant for the development improvement or scaling up of budget literacy initiatives *The Strategies of Australia's Universities* Timothy Devinney, Grahame Dowling, 2020-05-15 Over the last few decades universities in Australia and overseas have been criticized for not meeting the needs and expectations of the societies in which they operate At the heart of this problem is their strategy This book reviews the organizational level strategies of some of Australia's prominent universities It is based on their public documents that boldly report how they see their role in society and how they intend to navigate the future These strategic statements are written to proclaim relevance showcase achievements attract students and help to gain the support of the communities in which they operate Using a strategy framework taught in their business schools this book suggests that most such statements are deficient Grand aspirations substitute for realistic operations and outcomes The analysis also suggests that many of Australia's universities are poorly governed and have become too complex and bureaucratic A greater focus on their core responsibilities would help alleviate their current funding predicament
