**Engaged Research and Practice** Betty Overton,Penny A. Pasque,John C. Burkhardt,2023-07-03 What practices can researchers use to gain a more nuanced understanding of educational issues in the community and be part of the solution to those issues Engaged Research and Practice is about two prevailing and complementary ideas that have surfaced in the higher education arena engaged research and higher education for the public good Engaged research is scholarship that not only attempts to open up new knowledge but it does so with a sense that the new knowledge insight and directions have a direct relationship to needs and problems within our communities institutions and policy arenas Engaged actionable or participatory research and scholarship attempts to tackle the identified issues of our communities and society This handbook

offers important insights and tangible examples of how higher education leaders may work directly with communities and in policy settings to understand the deeper meanings often lost in conversations about educational opportunity Each chapter addresses the ways in which faculty community and administrative leaders may connect research and practice through unique research projects The authors offer clear explanations of how their engaged research was conducted to illustrate explicit pathways for practitioners This book also includes short narratives where authors involved with this research reflect on their experiences and the lessons they have learned while immersed in community and policy related work

**The Science of Boredom** Sandi Mann, 2017-11-02 Are we living in an age where we are more boredom prone Or are other people boring us Or could we be that boring person In our current information age we are constantly connected to technology and have so many varied ways to spend our leisure time that we should all surely never know what boredom feels like Yet boredom appears to be on the rise it seems that the more we have to stimulate us the more stimulation we crave In a quest to relieve our boredom we engage in dangerous risk taking from extreme sports to drugs to gambling to anti social behaviour or we overindulge in shopping or eating The Science of Boredom explores the causes and consequences of boredom in the fast paced twenty first century Parents are desperate to keep their children entertained during every waking moment the education system is geared towards interactivity and attention spans are dropping as we use multiple devices at all times But the world of work can be increasingly repetitive and routine and we are losing the ability to tolerate this everyday tedium Using Sandi Mann s own ground breaking research into boredom this book tells the story of how we act react and cope when we are bored and argues that there is a positive side to boredom It can be a catalyst for humour fun reflection creativity and inspiration The radical solution to the boredom problem is to harness it rather than try to avoid it Allowing yourself time away from constant stimuli can enrich your life We should all embrace our boredom and see the upside of our downtime
