

## Frog Dissection Pre-lab

### Why dissect a frog?

Frogs and humans are vertebrates with similar organ systems. Although all of the internal organs are not the same in frogs and humans, it is helpful to learn about anatomy through dissections. We will be looking at each body system, and exploring individual organs of the frog. We will make comparisons of the frogs' anatomy to our own.

The frogs that we will use in our lab were bred for the scientific purpose of learning anatomy. The companies that provide frogs make sure that the frogs are not an endangered species. The supply companies also use safe solutions to preserve the specimens. We will need to use gloves and wash our hands while working with preserved specimens.

Computer simulated dissections will be used in this lab by individuals who choose not to participate in the actual dissections.

The frogs gave their lives so that we can learn more about them and more about ourselves. In order to best use this opportunity to learn and show respect for the frog, we must follow all directions that are given to us and follow all safety procedures.

**Digestive System:** similar to humans

- adult frogs are carnivores
- frog has a large mouth with a tongue (attached at the front) used to capture insects
- has two sets of teeth (two on top, two below)
- swallowing of prey aided by its eyes (pressure pushes insects down to stomach)
- order of digestive system:  
1) mouth; (2) pharynx; (3) esophagus; (4) stomach; (5) small intestine; (6) large intestine; (7) cloaca (anus)
- frogs have a liver and pancreas too

**Circulatory System:**

- frogs are amphibians (thus, they are cold blooded)
- frogs have arteries, veins, capillaries, heart, and blood
- frog heart has 3 chambers: 2 atriums, 1 ventricle (human heart has 4 chambers: 2 of each)
- this causes there to be some mixing of oxygenated and de-oxygenated blood

**Respiratory System:**

- frogs exchange  $O_2$  and  $CO_2$  in their lungs, just like humans do
- frogs have 2 lungs for gas exchange, and nostrils for breathing
- $O_2$  can also diffuse directly through the frog's skin; that is why their skin is moist

### Dissection Safety Rules

1. Conduct yourself in a responsible and safe manner at all times during the dissection.
2. Wear safety glasses while you are dissecting even if you wear glasses or contact lenses. Contact lenses can hold chemicals in the eye(s) increasing the potential damage in the event of an accidental splashing of chemicals into the eye(s).
3. The frog has been preserved with a safe chemical and the classroom windows will be cracked open to allow fresh air in the room. However, if you need to take a break or the odor is beginning to bother you, notify the teacher.
4. Avoid contact with preservative chemicals. Keep your hands covered with the plastic gloves at all times. Rinse the frog completely before dissection.
5. Use the proper procedures described in the tutorial to pin the frog to the dissecting pan. Do not dissect the frog while holding it.
6. Handle the scalpel with extreme care. It is sharp enough to cut through skin.

# Frog Dissection Pre Lab Answer Key

**Judith W. Rosenthal**

## **Frog Dissection Pre Lab Answer Key:**

**These Eleven Years** Carole Freeman Nelson, 2002-11-27 *These Eleven Years* is a memoir of a non Catholic girl living with her single parent family in Seattle neighborhoods She attends Catholic school during the 1940 s and 1950 s and through her Catholic experiences she becomes a convert The emphasis on values rules and discipline are described The times and poverty which dictated a way of life are revealed Experiences of love friendship laughter and adventure are laced through each chapter The elements of urban life in Seattle during the 1940 s and the 1950 s are described throughout the book
