

Student Guide to the Frog Dissection

Dissection Instructions

1. Place the frog in the dissecting pan ventral side up.
2. Use scissors to lift the abdominal muscles away from the body cavity. Cut along the midline of the body to the forelimbs.
3. Make transverse (horizontal) cuts near the arms and legs.
4. Lift the flaps of the body wall and pin back.

*If your specimen is a female, the body may be filled with eggs. You may need to remove these eggs to view the organs.

Locate each of the organs below. Check the box to indicate that you found the organs.

1. **Fat Bodies** --Spaghetti shaped structures that have a bright orange or yellow color, if you have a particularly fat frog, these fat bodies may need to be removed to see the other structures. Usually they are located just on the inside of the abdominal wall. ☐
2. **Peritoneum** A spider-web like membrane that covers many of the organs; you may carefully pick it off to get a clear view ☐
3. **Liver**--The largest structure of the the body cavity. This brown colored organ is composed of three lobes. The **right lobe**, the **left anterior lobe**, and the **left posterior lobe**. The liver is not primarily an organ of digestion, it does secrete a digestive juice called bile. Bile is needed for the proper digestion of fats. ☐
4. **Heart** - at the top of the liver, the heart is a triangular structure. The **left and right atrium** can be found at the top of the heart. A single **ventricle** located at the bottom of the heart. The large vessel extending out from the heart is the **conus arteriosis**.☐

Frog Dissection Student Guide:

Laboratory Guide for the Study of the Frog Bertram Garner Smith, 1917 *The Student's Manual of Comparative Anatomy and Guide to Dissection* George Herbert Morrell, 1872 *A Laboratory Guide to Frog Anatomy* Eli C. Minkoff, 2013-10-22 A Laboratory Guide to Frog Anatomy is a manual that provides essential information for dissecting frogs. The selection provides comprehensive directions along with detailed illustrations. The text covers five organ systems namely skeletal, muscular, circulatory, urogenital, and nervous system. The manual also details a frog's major external and internal features. The book will be of great use to students and instructors of biology related laboratory course. **The Student's Manual of Comparative Anatomy, and Guide to Dissection** G. Herbert Morrell, 2023-04-13 Reprint of the original first published in 1872. The publishing house Anatiposi publishes historical books as reprints. Due to their age, these books may have missing pages or inferior quality. Our aim is to preserve these books and make them available to the public so that they do not get lost. **32 Quick & Fun Content Area Computer Activities** Lynn Van Gorp, 2006 Incite Grades 6-8 students enthusiasm to learn using technology in the curriculum. You'll enhance learning and encourage high order thinking by incorporating a technology project for every week of the school year. Students will develop key technology skills in word processing, spreadsheets, multimedia presentations, and using the Internet while you teach regular classroom content. Lessons are divided among content areas and the flexible projects are great for computer centers, labs, or one computer classrooms. The easy to follow teacher instructions and step by step student directions make this resource a hit in the classroom. The included Teacher Resource CD contains sample projects, templates, and assessment rubrics. 160pp *Carolina Science and Math* Carolina Biological Supply Company, 2003 *High School Hacks: A Student's Guide to Success in the IB and Beyond* Brianna Smrke, 2016-02-22 Brianna Smrke achieved the perfect score of 45 for her IB Diploma, a feat achieved by less than one percent of IB students internationally. In this remarkable first book, Brianna tells students who they can maximize the return on their educational effort by cultivating three habits of mind: focus, resourcefulness, and stacking. Approaching a task with an eye to what else it might be used for in addition to the stated purpose. These strategies directly respond to the challenges of 21st Century education but are also crucial to future career success. A mixture of anecdotes, references to pedagogical and cognitive research, and practical strategies are perfectly woven together to convey these ideas.

Laboratory Guide to Vertebrate Dissection for Students of Anatomy Arthur Beeny Appleton, 1929 As its title indicates, this is a book for use in a practical comparative anatomy course. It is intended for a somewhat unusual class of student and consequently its contents, outlook, and method of treatment are unlike those of the standard texts in this subject. As stated in the preface, it is assumed that the student has already done a course in elementary zoology including the usual vertebrate types and has also examined in more detail a mammal. Unless this mammal were man, a number of comparisons in the book would be missed. To obtain full benefit from it, the student should obviously have taken the preliminary medical

studies including a fair amount of human anatomy This is not meant to imply that the student of advanced zoology cannot get many useful hints and fresh points of view from its pages he undoubtedly can The types treated in a series of regional dissections are the lamprey the dogfish *Squalus Necturus* the lizard and the dog As it is intended for assistance in dissection information regarding osteology and the details of the central nervous system have been purposely omitted and conversely the muscles are treated somewhat more fully than is customary *The Latest and Best of TESS*, 1991 The Student's Guide to the Internet 2000-2001 Ian Winship, Alison McNab, 2000 A guide to the Internet written specifically for university and college students this handbook explains procedures and lists major subject information sources to help readers explore the Net to further their studies For this revised edition URLs have been reviewed and updated Many of the resources listed are new and more sources are listed to help with multimedia student sites and searching the Internet Topics include electronic mail discussion lists and newsgroups essential network etiquette techniques for browsing the WWW electronic journals and bibliographic databases help with overseas study loans jobs counselling and support subject searching resource guides and gateways what's new keeping up with new resources and producing your own Web pages Mobile Learning for All Luis Perez, 2013-05-09 Make learning more accessible with your iPad All students including those with special needs can benefit from having options for how they access curricular information The good news is that help is readily available on your iPad With this engaging all in one resource from an Apple Distinguished Educator you'll gain a practical toolkit to empower all of your students Here you'll find Step by step instructions tips and practice activities for using your iPad in conjunction with Universal Design for Learning guidelines Discussion and reviews of more than 150 applications Access to more than 20 video tutorials through QR codes located throughout the book *Experiential Youth Ministry Handbook, Volume 2* John Losey, 2007-08 More than just a handbook of games *Experiential Youth Ministry Handbook Volume 2* goes to the heart of learning Giving you the tools and ideas to create experiences and events that will help shape and form your students this book will equip you and your team to do more than just fun and games in your ministry *Handbook of Technological Pedagogical Content Knowledge (TPCK) for Educators* Mary C. A Skeptic's Guide to the Mind Robert A. Burton, 2013-04-23 In this scientific study a neurologist presents a critical startling and expansive journey into the mysteries of the brain and what makes us human What if our soundest most reasonable judgments are beyond our control Despite 2500 years of contemplation by the world s greatest minds and the more recent phenomenal advances in basic neuroscience neither neuroscientists nor philosophers have a decent understanding of what the mind is or how it works The gap between what the brain does and the mind experiences remains uncharted territory Nevertheless with powerful new tools such as the fMRI scan neuroscience has become the de facto mode of explanation of behavior Neuroscientists tell us why we prefer Coke to Pepsi and the media trumpets headlines such as Possible site of free will found in brain Or Bad behavior down to genes not poor parenting Robert Burton believes that while some neuroscience observations are real advances others are overreaching unwarranted wrong headed self serving or just plain ridiculous and often with the potential for catastrophic personal and social consequences In A Skeptic s Guide to the Mind he brings together clinical observations practical thought experiments personal anecdotes and cutting edge neuroscience to decipher what neuroscience can tell us and where it falls woefully short At the same time he offers a new vision of how to think about what the mind might be and how it works With a rich tapestry of neurological case studies allusions to film and literature compelling personal stories and challenging thought experiments Burton describes the abundant philosophical and scientific challenges to the belief that we know or even that we can know our own minds New York Times bestselling author Daniel Simons
