From Bauhaus To Our House Tom Wolfe:

From Bauhaus to Our House Tom Wolfe, Heberto Padilla, 1981 The strange saga of American architecture in the 20th century makes for both comedy and intellectual excitement as Wolfe debunks the Euro gods of modern and postmodern architecture and their American counterparts From Bauhaus to Our House Tom Wolfe, 2025-02-04 Wolfe takes European architects and Bauhaus art school founder Walter Gropius to task for their glass and steel box buildings which have influenced American cities New York Magazine , 1981-11-02 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea **The Theory of Architecture** Paul-Alan Johnson, 1994-04-18 The Theory of Architecture Concepts Themes Practices Paul Alan Johnson Although it has long been thought that theory directs architectural practice no one has explained precisely how the connection between theory and practice is supposed to work This guide asserts that architectural theory does not direct practice but is itself a form of reflective practice Paul Alan Johnson cuts through the jargon and mystery of architectural theory to clarify how it relates to actual applications in the field He also reveals the connections between new and old ideas to enhance the reader's powers of critical evaluation Nearly 100 major concepts themes and practices of architecture as well as the rhetoric of architects and designers are presented in an easily accessible format Throughout Johnson attempts to reduce each architectural notion into its essential concept By doing so he makes theory accessible for everyday professional discussion Topics are arranged under ten headings identification definition power attitudes ethics order authority governance relationship and expression Areas covered under these headings include Utopic thought in theories of architecture Advocacy and citizen participation in architecture The basis of architectural quality and excellence The roles of the architect as artist poet scientist and technologist Ethical obligations of architecture Rationales for models and methods of design How authority is determined in architecture How architects structure their concepts Conventions of communication within the architectural profession Each section begins by showing the etymology of key terms of the topic discussed along with a summary history of the topic's use in architecture Discussions probe the conceptual and philosophical difficulties of different theories as well as their potential and limitations in past and present usage Among the provocative issues discussed in terms of their relationship to architecture are chaos theory feminism service to the community and the use of metaphor Johnson points out with stunning clarity the intentions as well as the contradictions and inconsistencies of all notions and concepts All architects and designers as well as students and teachers in these disciplines will gain many insights about architectural thought in this groundbreaking text **The Postmodernist Turn** J. David Hoeveler, 2004 During the 1970s the United States became the world's preeminent

postindustrial society The new conditions changed the way Americans lived and worked and even their perceptions of reality Americans struggled to find their place in a world where symbol became more important than fact appearance more important than reality where image supplanted essence In this reassessment of a little studied decade J David Hoeveler Jr finds that the sense of detachment and dislocation that characterizes the postindustrial society serves as a paradigm for American thought and culture in the 1970s The book examines major developments in literary theory philosophy architecture and painting as expressions of a 1970s consciousness Hoeveler also explores the rival political readings of these subjects and considers the postmodernist phenomenon as it became an ideological battleground in the decade Clear and engaging the work will be of great interest to historians theorists and everyone who wants to further explore the 1970s **From Bauhaus to Our House** Tom Wolfe,1981 A Poetics of Postmodernism Linda Hutcheon,2003-09-02 First published in 1988 Routledge is an imprint of Taylor Francis an informa company **The Struggle for Modernism** Anthony Alofsin,2002 A history of modernism in the teaching of architecture landscape architecture and city planning at Harvard **Where Stuff Comes From** Harvey Molotch,2004-11-23 Molotch takes us on a fascinating exploration into the worlds of technology design corporate and popular culture We now see how corporations designers retailers advertisers and other middle men influence what a thing can be and how it is made We see the way goods link into ordinary life as well as vast systems of consumption economic and political operation The book is a meditation into the meaning of the stuff in our lives and what that stuff says about us Architectural History Retold Paul Davies,2015-08-27 How much do you know about Greek architecture Roman Gothic The Renaissance Modernism Perhaps more importantly do you know how these are connected or how one style evolved to become another Or what happened historically during each of these periods Architectural History Retold is your roadmap for your journey through architectural history Offering a fresh take on what the author calls the Great Enlightenment project it traces the grand narrative of western architecture in one concise accessible volume Starting in Ancient Greece and leading up to the present day Paul Davies unconventional engaging style brings the past back to life helping you to think beyond separate components and styles to recognise the bigger picture The author is an academic and journalist with three decades of experience in introducing students to architectural history The book is based on his successful entry level course which has used the same unstuffy approach to break down barriers to understanding and engagement and inspire generations of students *American Design in the Twentieth Century* Gregory Votolato,1998 Author Greg Votolato presents the intricate story of how design evolved as a profession and a leisure activity Votolato demonstrates that design in affluent American culture is as much about personalization of the material world as it is about the performance and appearance of manufactured goods 114 illustrations **Renegades** Luca Guido,Stephanie Pilat,Angela Person,2020-01-28 Like America itself the architecture of the United States is an amalgam an imitation or an importation of foreign forms adapted to the natural or engineered landscape of the New World So can there be an American School of

architecture The most legitimate claim to the title emerged in the 1950s and 1960s at the Gibbs College of Architecture at the University of Oklahoma where under the leadership of Bruce Goff Herb Greene Mendel Glickman and others an authentically American approach to design found its purest expression teachable in its coherence and logic Followers of this first truly American school eschewed the forms most in fashion in American architectural education at the time those such as the French Beaux Arts or German Bauhaus Schools in favor of the vernacular and the organic The result was a style distinctly experimental resourceful and contextual challenging not only established architectural norms in form and function but also traditional approaches to instructing and inspiring young architects Edited by Luca Guido Stephanie Pilat and Angela Person this volume explores the fraught history of this distinctively American movement born on the Oklahoma prairie Renegades features essays by leading scholars and includes a wide range of images including rare never before published sketches and models Together these essays and illustrations map the contours of an American architecture that combines this country's landscape and technology through experimentation and invention assembling the diversity of the United States into structures of true beauty Renegades for the first time fully captures the essence and conveys the importance of the American School of architecture

Getting Back Into Place Edward S. Casey, 1993 Offers a philosophical exploration of the pervasiveness of place Presenting an account of the role of place in human experience this book points to place's indispensability in navigation and orientation The role of the lived body in matters of place is considered and the characteristics of built places are explored

Building from Belief Michael E. DeSanctis, 2017-06-15 Imagine what Sundays in a parish could be if worshiping communities are assured that the liturgy in their spaces might be a foretaste of the heavenly liturgy Or what town hall meetings could also be in a place where parish committees are inspired to know that they can be the instruments of truth and beauty The essays in Building from Belief focus on Catholic church architecture and invite those who are involved in the creation of worship space to be the world's memory of what beauty looks like and what sanctity feels like In Building from Belief Michael DeSanctis treats a variety of topics that concern the creation and use of liturgical space He brings the historical development of both the Church and its architecture into clear view and focuses on the need for catechesis and conversion DeSanctis calls for a change of heart on the part of the worshiping community the building committee professionals involved in the design process and of the Church By keeping the theological concepts of grace and sacramentality in mind he offers

rich insights to these fundamental Christian realities and provides hope and excitement about using the gifts of beauty grace and holiness The essays in *Building from Belief* are an invitation to build the promised kingdom allowing the grace of God into our hearts and in our spaces DeSanctis encourages those who embark on the journey of building to ask the same question that the Fathers of Vatican II asked how to be Church in a modern world He shows that the worship that rises from our communities is indeed a true expression of that belief Chapters under Part I are Beauty Holiness and Liturgical Space Catholic Sacramentality and the Reform of Sacred Architecture The Pastoral Dimension of Church Renovation Let s Stop Renovating Church Buildings And Start Renovating the Church and Coming to Terms with Modern Design Chapters under Part II are Worshiping in No place Casual Observations on Liturgy in the Second Machine Age Images By Which We Live and Build and The Quest for Noble Simplicity Includes eight pages of full color photographs with black and white photographs and illustrations throughout Imagine what Sundays in a parish could be if worshiping communities are assured that the liturgy in their spaces might be a foretaste of the heavenly liturgy Or what town hall meetings could also be in a place where parish committees are inspired to know that they can be the instruments of truth and beauty The essays in *Building from Belief* focus on Catholic church architecture and invite those who are involved in the creation of worship space to be the world s memory of what beauty looks like and what sanctity feels like In *Building from Belief* Michal DeSanctis treats a variety of topics that concern the creation and use of liturgical space He brings the historical development of both the Church and its architecture into clear view and focuses on the need for catechesis and conversion DeSanctis calls for a change of heart on the part of the worshiping community the building committee professionals involved in the design process and of the Church By keeping the theological concepts of grace and sacramentality in mind he offers rich insights to these fundamental Christian realities and provides hope and excitement about using the gifts of beauty grace and holiness The essays in *Building from Belief* are an invitation to build the promised kingdom allowing the grace of God into our hearts and in our spaces DeSanctis encourages those who embark on the journey of building to ask the same question that the Fathers of Vatican II asked how to be Church in a modern world He shows that the worship that rises from our communities is indeed a true expression of that belief

Nelson Goodman and Modern Architecture Kasper Lægning, 2024-07-19 This book orchestrates a convergence of two discourses from the 1960s Nelson Goodman s aesthetic theory on one side and critiques of modern architecture articulated by figures like Peter Blake Charles Jencks and Robert Venturi Denise Scott Brown on the other Grounded in Goodman s aesthetic theory the book explores his conceptual framework within the context of modern architecture At the heart of the investigation lies Goodman s concept of exemplification While his notion of denotation pertains to representational elements often ornaments in architecture exemplification accentuates specific formal properties at the expense of others including color spatial orientation transparency seriality and the like Supplemented by findings from phenomenology the book traces these effects in buildings notably those by Ludwig Mies van der Rohe Walter Gropius Le

Corbusier and Frank Lloyd Wright all key figures in the critiques of modern architecture Employing Goodman's framework the book aims to address accusations of emptiness and alienation directed at modern architecture in the postwar era It illustrates that modern architecture symbolizes aesthetically in a fundamentally different way than architecture from earlier periods This book will be of interest to architects artists researchers and students in architecture architectural history theory cultural theory philosophy and aesthetics

The Geography of Hope Chris Turner, 2010-04-30 After the fierce warnings and grim predictions of *The Weather Makers* and *An Inconvenient Truth* acclaimed journalist and national bestselling author Chris Turner finds hope in the search for a sustainable future Point of no return The chilling phrase has become the ubiquitous mantra of ecological doomsayers a troubling headline above stories of melting permafrost and receding ice caps visions of catastrophe and fears of a problem with no solution Daring to step beyond the rhetoric of panic and despair *The Geography of Hope* points to the bright light at the end of this very dark tunnel With a mix of front line reporting analysis and passionate argument Chris Turner pieces together the glimmers of optimism amid the gloom and the solutions already at work around the world from Canada's largest wind farm to Asia's greenest building and Europe's most eco friendly communities But *The Geography of Hope* goes far beyond mere technology Turner seeks out the next generation of political economic social and spiritual institutions that could provide the global foundations for a sustainable future from the green hills of northern Thailand to the parliament houses of Scandinavia from the villages of southern India where microcredit finance has remade the social fabric to America's most forward thinking think tanks In this compelling first person exploration punctuated by the wonder and angst of a writer discovering the world's beacons of possibility Chris Turner pieces together a dazzling map of the disparate landmarks in a geography of hope While most of the world has been spinning in stagnant circles of recrimination and debate on the subject of climate change paralyzed by visions of apocalypse both natural if nothing of our way of life changes and economic if too much does Denmark has simply marched off with steadfast resolve into the sustainable future reaching the zenith of its pioneering trek on the island of Sams And so if there's an encircled star on this patchwork map indicating hope's modest capital then it should be properly placed on this island Perhaps for the sake of precision at the geographic centre of Jørgen Tranberg's dairy farm There are I'm sure any number of images called to mind by talk of ecological revolution and renewable energy and sustainable living but I'm pretty certain they don't generally include a hearty fiftysomething Dane in rubber boots spotted with mud and cow shit Which is why Sams's transformation is not just revolutionary but inspiring not just a huge change but a tantalizingly attainable one And it was a change that seemed at its most workaday near effortless no more remarkable than the cool October wind gusting across the island down on Tranberg's farm from *The Geography of Hope*

Bauhaus 1919-1933 Barry Bergdoll, Leah Dickerman, 2009 The Bauhaus the school of art and design founded in Germany in 1919 and shut down by the Nazis in 1933

brought together artists architects and designers in an extraordinary conversation about modern art Bauhaus 1919 1933 published to accompany a major multimedia exhibition at MoMA is the first comprehensive treatment of the subject by MoMA since 1938 and offers a new generational perspective on the 20th century's most influential experiment in artistic education It brings together works in a broad range of mediums including industrial design furniture architecture graphics photography textiles ceramics theatre and costume design and painting and sculpture many of which have rarely if ever been seen outside of Germany Featuring about 400 colour plates and a rich range of documentary images this publication includes two overarching images by the exhibition's curators Leah Dickerman and Barry Bergdoll concise interpretive essays on key objects by over twenty leading scholars and an illustrated narrative chronology *The British Critical Tradition* Gary Day, 1993-01-12 This collection offers a reinterpretation of the history of British criticism by exploring the work of neglected as well as celebrated critics It contextualizes the current crisis and shows how traditional criticism anticipates and to some extent parallels the concerns of postmodern critical theory The issue of value is also addressed as is the question of the future direction of criticism making this volume an important contribution to contemporary critical debate
