**Emergence of the U.S. Army's Armor Branch, 1917-1945** Robert S. Cameron, The following pages provide a narrative analysis of the U S Army's development of armored organizations and their related doctrine materiel and training activities in the period 1917-1945 The development of new armor doctrines and organizations to exploit emerging technologies concepts and missions is the heart of this work How that transition was accomplished during the brief space of about twenty years the accepted duration of a single generation is a story worthy of careful examination as our Army gropes with managing similar transformations today      **Made, Not Born** Bruce Newsome, 2007-09-30 Why do the combat capabilities of individual soldiers vary so much This book seeks to provide an answer to this and other questions about variability in combat performance Some soldiers flee quickly from the battlefield while others endure all hardships until the bitter end Some combat units can perform numerous types of missions while others cannot keep themselves organized during peacetime Some militaries armed with obsolete weapons have out fought enemies with the latest weapons just as some massively outnumbered armies have beaten back much larger opponents In this first social scientific study of the effectiveness of combat troops Newsome evaluates competing explanations for the varying combat capabilities and performances There are four main explanations each emphasizing the influence of a single factor The first focuses on material endowments How well funded are the troops Do they have the latest protective gear and the most advanced weaponry Second some analysts claim that democracies produce better commanders superior strategies more motivated personnel or better managed personnel others however associated those characteristics with more authoritarian forms of government Third is the idea that giving more power to the troops on the ground in individual combat units empowers them with decision making capability and adaptability to fast changing situations and circumstances Newsome presents evidence that decentralized personnel management does correlate with superior combat performance Fourth soldier capabilities and performance often are assumed to reflect intrinsic attributes such as prior civilian values Newsome argues that the capabilities of combat soldiers are acquired through military training and other forms of conditioning but he does not entirely discount the role of a soldier's individual character In the age old nature vs nurture argument he finds that intrinsic qualities do count but that extrinsic factors such as training and environment matter even more      Transportation Corps Professional Bulletin, 1992

Through Mobility We Conquer George Hofmann, 2006-07-03 The U S Cavalry which began in the nineteenth century as little more than a mounted reconnaissance and harrying force underwent intense growing pains with the rapid technological developments of the twentieth century From its tentative beginnings during World War I the eventual conversion of the traditional horse cavalry to a mechanized branch is arguably one of the greatest military transformations in history Through

Mobility We Conquer recounts the evolution and development of the U S Army s modern mechanized cavalry and the doctrine necessary to use it effectively The book also explores the debates over how best to use cavalry and how these discussions evolved during the first half of the century During World War I the first cavalry theorist proposed combining arms coordination with a mechanized force as an answer to the stalemate on the Western Front Hofmann brings the story through the next fifty years when a new breed of cavalymen became cold war warriors as the U S Constabulary was established as an occupation security police force Having reviewed thousands of official records and manuals military journals personal papers memoirs and oral histories many of which were only recently declassified George F Hofmann now presents a detailed study of the doctrine equipment structure organization tactics and strategy of U S mechanized cavalry during the changing international dynamics of the first half of the twentieth century Illustrated with dozens of photographs maps and charts Through Mobility We Conquer examines how technology revolutionized U S forces in the twentieth century and demonstrates how perhaps no other branch of the military underwent greater changes during this time than the cavalry
