

GEOGRAPHY FINAL EXAM PART 2

To begin with I would like to state the meaning of urbanization which means shifting of people from rural to urban areas to get the benefits of urban environment. Earlier there was more people living in rural area and less people in urban area. But with the passage of time people started shifting to urban areas because they get more and more choices in urban area than rural area as companies has more settlement in urban areas than rural areas. So they get better livings in urban areas as most of the MNCs are in urban area and there in better living standard in cities and towns. There is the connection of urbanization and globalization. As globalization impact the cities most because they have hub in urban area. So this helps to advancement of urban which has the deep connection with globalization. In short we can say that urbanization is just because of globalization. There are different challenges faced by cities in core. Let's discuss some of them

1. Deindustrialization: as normally in urbanization we think that with globalization there is occurrence of urbanization but here with huge urbanization, there is reduction of industrial employment in core regions. As people started moving from country side to urban areas which decline the employment rates in core areas as there is crowd of employees which reduces the employment rates in the cities.
2. Suburbanization: this also leads to migration of people from cities and towns to suburbs. As in cities people are living in so congested areas so they move to the outer skirts of cities or sometimes to distance from urban areas.
