Listening, Belonging, and Memory Abigail Gardner,2023-07-13 Listening Belonging and Memory puts connected listening at the center of current debates around whose voices might be listened to who by and why Arguing that listening has to be understood in relation to the self nation age witnessing and memory it uses examples from digital storytelling listening projects and critical media analysis to highlight connections between listening and power It centers on voices stories and silence how they interweave and are activated maneuvered reconfigured and denied It focuses on the small microengagements that crouch within the superstructures of violent border control and the censorious policing of sonic citizenry identifying cracks in the reshuffling of histories and hierarchies that connected listening affords

Cartography Jochen Schiewe,2025-09-02 What would our lives look like if there were no good maps Maps are essential for orientation navigation and simplifying complex environments ultimately enhancing our understanding of the world The visualization of geospatial data supports both laypeople and experts in various aspects of life whether in personal professional or scientific contexts With the growing availability of maps online they are increasingly used in daily life on devices such as smartphones and tablets However the surge in map creation does not necessarily equate to the production of good maps those that effectively and efficiently fulfill their intended purpose This book explores the full breadth of the field of Cartography It delves into the core of the discipline focusing on the graphical representation of geospatial data spatial

reference and map projections. Additionally, it addresses key peripheral topics that contribute to a comprehensive understanding, such as usability testing, data collection and processing, and cartographic law. Rather than providing technical or software-specific guidance, the author emphasizes the fundamental concepts and methods of modern Cartography. Introductory chapters, overviews, numerous illustrations, and practical exercises support this approach. This textbook is a valuable resource for students and educators across various fields: Cartography, Geography, Geodesy, Urban and Regional Planning, Environmental Sciences, and more. It aids in the creation and use of good maps and provides a solid foundation in modern Cartography for anyone with an interest in maps.
