Robotics in Healthcare João Silva Sequeira, 2020-02-17 The work is a collection of contributions resulting from R D efforts originated from scientific projects involving academia technological partners and end user institutions The aim is to provide a comprehensive overview of robotics technology applied to Healthcare and discuss the anticipation of upcoming challenges The intersection of Robotics and Medicine includes socially and economically relevant areas such as rehabilitation therapy and healthcare Innovative usages of current robotics technologies are being somewhat stranded by concerns related to social dynamics The examples covered in this volume show some of the potential societal benefits robotics can bring and how the robots are being integrated in social environments Despite the aforementioned concerns a fantastic range of possibilities is being opened The current trend in social robotics adds to technology challenges and requires R D to think about Robotics as an horizontal discipline intersecting social and exact sciences For example robots that can act as if they have credible personalities not necessarily similar to humans living in social scenarios eventually helping people Also robots can move inside the human body to retrieve information that otherwise is difficult to obtain The decision autonomy of these robots raises a broad range of subjects though the immediate advantages of its use are evident The book presents examples of robotics technologies tested in healthcare environments or realistically close to being deployed in the field and discusses the challenges involved Chapter 1 provides a comprehensive overview of Healthcare robotics and points to realistically expectable developments in the near future Chapter 2 describes the challenges deploying a social robot in the Pediatrics ward of an Oncological hospital for simple edutainment activities Chapter 3 focuses on Human Robot Interaction techniques and their role in social robotics Chapter 4 focus on R D efforts behind an endoscopic capsule robot Chapter 5 addresses experiments in rehabilitation with orthotics and walker robots These examples have deep social and economic relations with

the Healthcare field and at the same time are representative of the R D efforts the robotics community is developing

Interactive Collaborative Robotics Andrey Ronzhin, Gerhard Rigoll, Roman Meshcheryakov, 2020-09-30 This book constitutes the proceedings of the 5th International Conference on Interactive Collaborative Robotics ICR 2020 held in St Petersburg Russia in October 2020 The 31 papers presented were carefully reviewed and selected from 62 submissions Challenges of human robot interaction robot control and behavior in social robotics and collaborative robotics as well as applied robotic and cyber physical systems are mainly discussed in the papers *Distributed Networks* Qurban A. Memon, 2017-12-19 For many civilian security and military applications distributed and networked coordination offers a more promising alternative to centralized command and control in terms of scalability flexibility and robustness It also introduces its own challenges Distributed Networks Intelligence Security and Applications brings together scientific research in distributed network intelligence security and novel applications The book presents recent trends and advances in the theory and applications of network intelligence and helps you understand how to successfully incorporate them into distributed systems and services Featuring contributions by leading scholars and experts from around the world this collection covers Approaches for distributed network intelligence Distributed models for distributed enterprises including forecasting and performance measurement models Security applications for distributed enterprises including intrusion tackling and peer to peer traffic detection Future wireless networking scenarios including the use of software sensors instead of hardware sensors Emerging enterprise applications and trends such as the smartOR standard and innovative concepts for human machine interaction in the operating room Several chapters use a tutorial style to emphasize the development process behind complex distributed networked systems and services which highlights the difficulties of knowledge engineering of such systems Delving into novel concepts theories and advanced technologies this book offers inspiration for further research and development in distributed computing and networking especially related to security solutions for distributed environments

Biomechanics, Sensing and Bio-inspired Control in Rehabilitation and Wearable Robotics Wujing Cao, Zirui Lan, Ningbo Yu, Keyi Wang, Wenwei Yu, 2024-12-11 Research on biomechanics sensing and bio inspired control is vital for progressing rehabilitation and wearable robotics Biomechanical simulation can provide the theoretical basis for device design and optimize the design and control scheme The fusion of bio signals neural signals and physical signals is helpful for accurate perception and recognition of human motion intention Bio inspired control is an important direction of individualized and efficient assistance of rehabilitation and wearable robotics In recent years with the development of biomedical and information technology the equipment used for information acquisition has been updated from cumbersome and immobile devices to small and portable ones making integration with rehabilitation and wearable robotics easier Moreover the performance of rehabilitation and wearable robotics can be quantified by changes in biomechanics and through the use of biosensors The proposed Research Topic invites theoretical and experimental research dealing with novel

techniques for quantifying biomechanics sensing and bio inspired control in rehabilitation and wearable robotics For example the use of biologically inspired actuators no longer requires rigid supports as the skeletal system can be used to that end the application of synergies or motor primitives has led to a reduction in the number of actuators or to improve their control The latest advances in modeling and simulation made it possible to assess and control fatigue or simulate using such devices outside of a clinical environment These research achievements enable a new generation of rehabilitation and wearable robotics
