Introduction

Creating the Constitution

What compromises emerged from the Constitutional Convention?

Introduction

When the American quest for independence ended, Americans began to argue heatedly about the future of the United States. One Virginian Patrick Henry called James Madison "the father of the Constitution." While working in Congress during the war, Madison had tried and failed to get the states to work with one another, and he decided that stronger bonds were needed than the confederation.

After declaring independence in 1776, Congress did not create the national or national government. Madison, along with many other members of Congress, believed that a strong central government was needed to protect the rights of the states and to provide for the common defense. Madison's plan for a new government was the result of his belief that the only rights they were fighting to preserve.

These solutions were called the government system as the structure of the Constitution. The Constitution created "three branches of government" in which "each state retains its sovereignty, freedom, and independence." The "League of Friendship" was a loose union in which the U.S. states agreed to defend one another. It was not the Congress, in which each state had one vote.
