Dr. Andrew emphasizes the urgent need for action to mitigate the effects of climate change and protect the planet for future generations.

Dr. Andrew explains that the current scientific consensus is that climate change is real and is caused by human activities, primarily the burning of fossil fuels. He notes that the effects of climate change are already being felt, including rising sea levels, more frequent and severe weather events, and the loss of biodiversity. He stresses the importance of taking action now to prevent the worst-case scenarios from becoming a reality.

What is the impact of climate change?

Dr. Andrew states that the impact of climate change is far-reaching and affects every aspect of our lives. It includes the loss of jobs and income, the displacement of millions of people, and the destruction of ecosystems and natural resources.
