Largest Bony Fish on Record Found in Azores Islands, Portugal

Boaters and fishermen reported a colossal carcass of a dead fish floating in the waters near Faia Island, a part of the Azores Archipelago.

Researchers have responded to the call and when they reached the area, they identified the carcass to be of a bump-head sunfish.

The community of Faia Islands helped in removing the carcass out of the water. According to Dr. David Torres, head of the research team, the carcass weighed about 6,000 pounds, it's approximately 800 pounds heavier than the last recorded heaviest bony fish.

Dr. David Torres together with Mr. Rodrigo Peri, one of the fishermen that found the 6,000 pound sunfish carcass in Azores Islands, Portugal last December 2, 2050.

"We thought it was a whale carcass, so we were on alert that there might be a huge predator around us" remarked Mr. Peri.
