

ACHIEVING PRODUCT DEVELOPMENT SUCCESS THROUGH A CONSOLIDATED SIMULATION PLATFORM

January 2018

- **Automated design analysis**
enabling product development

- **Multi-physics simulation**
analysis

Report highlights

Integrating is the overwhelming challenge today by efforts everywhere – making it harder to evaluate the impact of different design alternatives.

When the time to release a new product is approaching, product development is often a collection of silos. Throughout the product lifecycle and design process,

simulation has become an essential element in ensuring that designs are delivered, production is streamlined, and the customer is satisfied. Platforms that can integrate design,

engineering, a consolidated development platform, secure data, and robust system collaboration. This global enterprise structure enables strategic growth, optimized for multiple markets.

As the industry continues to evolve, the need for a consolidated platform is becoming increasingly apparent. Specifically, it will help in the development of new products and in the management of the product lifecycle. The platform will help in the management of the product lifecycle, from design to production, and in the management of the product lifecycle, from design to production.
