Myths and Realities John Whedbee,2005 Myths and Realities creates a comprehensive picture of human life and culture while at the same time placing it within the larger cosmic context In recent decades all areas of human knowledge have expanded to an unprecedented degree so the overall context of human existence is at last beginning to emerge In order to present such a wide ranging portrait Myths and Realities looks at history and human nature from several different viewpoints giving special attention to four major topics culture science religion and

war Science is a major contributor because it is the most reliable means of acquiring knowledge Religion is part of the wider subject of beliefs in general and these have been given particular consideration because any kind of ideology or belief tends to distort the worldview War has been mankind's constant companion but without its underlying mythology it would lose all glory and romance It would just be senseless savagery Although man has many distinctive qualities one of his most remarkable characteristics is his capacity to believe in all kinds of nonsensical notions In fact the human animal will believe practically anything so long as it makes absolutely no sense at all

Nichols, 2017-09-29 Public Sociology features a wide ranging discussion of the controversial model of a social science that reaches out to non academic audiences including both average citizens and policymakers This approach has been greeted with enthusiasm by supporters and with skepticism and anxiety among critics Both perspectives are well represented in this volume Some of the critical voices question whether public sociology is even a good idea Others dissent arguing for a strong program in professional sociology as an alternative Still others express concern that public sociology promotes a liberal left political agenda despite its nonpartisan pretensions Some elements of the model are queried such as critical sociology Others are supportive discussing personal experiences the benefits of an engaged social science and how it could take social science into a broader global marketplace Following an introduction by the editor the contributions include David Boyns and Jesse Fletcher Public Relations Disciplinary Identity and the Strong Program in Professional Sociology Jonathan H Turner Is Public Sociology Such a Good Idea Steven Brint Guide to the Perplexed Vincent Jeffries Piritim A Sorokin's Integralism and Public Sociology Norella M Putney Dawn E Alley and Vern L Bengtson Social Gerontology as Public Sociology in Action Edna Bonacich Working with the Labor Movement A Personal Journey in Organic Public Sociology Christopher Chase Dunn Global Public Social Science Neil McLaughlin Lisa Kowalchuk and Kerry Turcotte Why Sociology Does Not Need to be Saved Michael Burawoy Third Wave Sociology and the End of Pure

On Justice Mathias Risse, 2020-09-10 Though much attention has been paid to different principles of justice far less has been done reflecting on what the larger concern behind the notion is In this work Mathias Risse proposes that the perennial quest for justice is about ensuring that each individual has an appropriate place in what our uniquely human capacities permit us to build produce and maintain and is appropriately respected for the capacity to hold such a place to begin with Risse begins by investigating the role of political philosophers and exploring how to think about the global context where philosophical inquiry occurs Next he offers a quasi historical narrative about how the notion of distributive justice identifies a genuinely human concern that arises independently of cultural context and has developed into the one we should adopt now Finally he investigates the core terms of this view including stringency moral value ground and duties of justice

The Venetian Discovery of America Elizabeth Horodowich, 2018-09-06 Few Renaissance Venetians saw the New World with their own eyes As the print capital of early modern Europe however Venice developed a unique relationship to the Americas Venetian editors mapmakers translators writers and cosmographers represented the New World at times as a place that the city's mariners had discovered before the Spanish a world linked to Marco Polo's China or another version of Venice especially in the case of Tenochtitlan Elizabeth Horodowich explores these various and distinctive modes of imagining the New World including Venetian rhetorics of firstness similitude othering comparison and simultaneity generated through forms of textual and visual pastiche that linked the wider world to the Venetian lagoon These wide ranging stances allowed Venetians to argue for their different but equivalent participation in the Age of Encounters Whereas historians have traditionally focused on the Spanish conquest and colonization of the New World and the Dutch and English mapping of it they have ignored the wide circulation of Venetian Americana Horodowich demonstrates how with their printed texts and maps Venetian newsmongers embraced a fertile tension between the distant

and the close In doing so they played a crucial yet heretofore unrecognized role in the invention of America
