Limited Numbered book. The Real Colors for aircraft models could not be introduced without releasing a special book devoted to this subject. Renowned researchers Maciej G ralczyk, Gerald T H gl, J rgen Kiroff, Nicholas Millman and Mikhail V Orlov teamed up in order to produce the most up to date reference book on the aircraft colors of the main WWII adversaries: Germany, United States, Great Britain and Soviet Union. The resulting study is a comprehensive guide to the colors and camouflage schemes presented on 292 pages and illustrated with 42 color profiles, several document reprints and 390 b/w and color photos, many of which are very rare. Included is the latest information on the Luftwaffe's late war colors which have been reproduced as scale colors on the basis of the original paint factory recipes by Gerald T H gl and J rgen Kiroff. For the very first time the unparalleled research on the Soviet Air Force colors done by Mikhail V Orlov is introduced to the non-Russian readers. Nicholas Millman's archival research brings us accurate reproduction and description of the colors used by the USAAF, US Navy and RAF. FAA. This book is a true must have for anyone with even a slight interest in WWII aircraft colors. *A History of the Mediterranean Air War, 1940-1945* Christopher Shores, Russell Guest, 2025-09-30 In 1943 Allied bombers from Italy launched strategic attacks on Axis oil fields, factories and Danube supply routes. Following the inter Allied Casablanca Conference in January 1943, the outline for the Combined Bomber Offensive was agreed and resulted in early February with the Casablanca Directive. This required the progressive destruction and dislocation of the German military, industrial and economic systems and the undermining of the morale of the German people to a point where their

capacity for armed resistance is fatally weakened This directive was clarified in June when the Combined Chiefs of Staff issued the Pointblank Directive that stated that the highest priority targets were the fighter aircraft factories to ensure that in the coming invasion of France the enemy would not have air superiority When these directives were issued it was envisaged that as well as attacks by RAF Bomber Command and the US 8th Air Force based in England the strategic bomber forces in Italy would begin operations once suitable bases were available After the Allied landings in Italy and resulting collapse of the Italian fascist regime a network of bomber bases was hastily developed Thus on 1 November 1943 the US 15th Air Force was formed to conduct the daylight bombing offensive against strategic targets in southern Germany and across southeastern Europe Key among these were the Rumanian oilfields and traffic along the River Danube This new formation was joined by the smaller but highly effective 205 Group RAF that was trained and equipped for night bombing so mirroring their equivalent British based formations The damaging attacks on the Reich's oil supplies and the highly effective Danube mining campaign conducted at night by 205 Group delivered huge strategic effect The latter reduced vital oil and goods traffic into the Reich to a trickle but also dislocated the supply and logistics train into the southern part of the Eastern Front so giving manifest support to the Soviets In this volume the early months of this hugely significant air campaign are described in minute and original detail and are accompanied by hundreds of hitherto unpublished photographs In combating these attacks Germany's Axis allies such as Hungary Rumania Bulgaria and Slovakia were encountered for the first time by the Western Allies

Magyar Warriors Dénes Bernád, Charles K. Klimment, 2015-02-19 The first book in the comprehensive two volume reference covering all aspects of the Hungarian military from the interwar period through WWII During the First World War Hungary lost territories containing sizable Magyar ethnic populations In the years following the war and especially in the 1930s the country attempted to regain portions of these territories through a series of border wars The corresponding buildup of armed forces with assistance from Italy and Germany positioned Hungary as a valuable if secondary member of the Axis powers This comprehensive reference provides a complete picture of the Hungarian armed forces between the years 1919-1945 It starts with a brief history of the Magyars describes the political situation in Hungary before and during WWII the building of the armed forces the growth of domestic arms manufacturers the organization of the armed forces units and how they changed during the war The various campaigns of the war are described in great detail illustrated with more than 500 photographs as well as numerous tables and maps

The Messerschmitt 210/410 Story Jan Forsgren, 2019-09-17 In 1938 the Reichsluftfahrtministerium German Air Ministry RLM issued a requirement for a new twin engine heavy fighter to replace the Me 110 This type of combat aeroplane was known as Zerstörer Destroyer The first prototype flew in September 1939 The Me 210 proved very difficult to fly having numerous deficiencies It was said to be deadlier to its crews than the enemy Nevertheless the Luftwaffe ordered the Me 210 into production Operational trials began in late 1941 but it was eventually acknowledged that the aircraft had to be redesigned in order to be accepted into Luftwaffe

service The whole Me 210 debacle proved a huge scandal A redesigned variant the Me 410 began to reach Luftwaffe units in mid 1943 Even if the Me 210 and Me 410 were similar in appearance the latter had to be redesigned to avoid the extremely poor reputation of the Me 210 The Me 410 proved a quite successful aeroplane being used as a heavy fighter and for reconnaissance duties Its closest Allied equivalent was the British DH 98 Mosquito More than 1 500 Me 210 410s were built in Germany and Hungary with only two Me 410s surviving today

Austro-Hungarian Aces of World War 1 Chris Chant, 2012-12-20 Featuring illustrations throughout a detailed exploration of the unlikely aces among the Austro Hungarians Starting the war with only 35 aircraft Austro Hungarian industry went on to produce only moderate numbers of poor quality aircraft The fliers of the Austro Hungarian Empire operating on the Serbian and Russian fronts were fortunate at first finding themselves faced by small numbers of aircraft yet more obsolescent than their own Serbia fell in 1915 but when Italy declared war the Austro Hungarians were still faced with a two front war a static front against Italy and a far more fluid one against Russia As Christopher Chant explains in this compact volume Austro Hungarian fighter pilots performed bravely and often very effectively under extremely difficult geographic climatic and operational conditions

The Messerschmitt Bf 110 Story Jan Forsgren, 2024-06-03 A highly capable twin engined destroyer fighter bomber and night fighter the Messerschmitt Bf 110 unofficially the Me 110 was in Hermann Goring's estimation the pick of the Luftwaffe's offensive fighters Drawing on the personal recollections of pilots and aircrew as well as the individual histories of principal units and non Luftwaffe operators The Messerschmitt Bf 110 Story charts the aircraft's operational service in Poland the Battle of Britain North Africa and the Eastern Front It offers deep technical analysis on the aircraft's design and performance alongside competitors such as the Focke Wulf Fw 57 and Henschel Hs 124 and opponents like the French Potez 630 631 series and Polish PZL 38 The few Bf 110s that have survived in preservation are also explored in this comprehensive operational and technical account of the Luftwaffe's famous Zerstörer

Austro-Hungarian Albatros Aces of World War 1 Paolo Varriale, 2012-12-20 Austro Hungarian industry produced a series of poor fighter types such as the Pfennig D I and Hansa Brandenburg D I during the early stages of the war and it was not until licence built examples of the battle proven Albatros D II and D III began to reach Fliegerkompagnien or Fliks in May 1917 that the fortunes of pilots began to look up Unlike the German built Albatrosen the Oeffag aircraft were far more robust than German D IIs and D IIIs They also displayed superior speed climb manoeuvrability and infinitely safer flight characteristics The careful cross checking of Allied sources with Austrian and German records form the basis for a detailed reconstruction of the dogfights fought by the leading aces It will also chart the careers of the Austro Hungarian aces that flew the D II and D III their successes and their defeats with additional information about their personal background and their post war lives in the nations born from the collapse of the Hapsburg Empire

Slovakian and Bulgarian Aces of World War 2 Jiri

Rajlich,Stephan Boshniakov,Petko Mandjukov,2012-12-20 The story of the Slovak and Bulgarian aces and how they fought alongside Germany in Messerschmitts In 1939 Slovakia signed a protection agreement with the German Reich and joined the attack on Poland where its Avia B 534 equipped fighter squadrons claimed their first kills In October 1942 having made do with obsolete aircraft the Slovaks were equipped with Bf 109Es and eventually acquired 43 Messerschmitt fighters The Slovaks would claim over 215 kills Although it supported German efforts in Yugoslavia and Greece Bulgaria did not declare war on Russia First seeing action in August 1943 Bulgarian fighter pilots used their Bf 109Gs to good effect As this book

outlines from late 1943 through to mid 1944 the Bulgarian pilots attempted to defend the country from American bombers and Stoyanov and Bochev made ace during this period **Enemy at the Gates** Justo Miranda,2019-12-08 When the Nazis started to threaten the world with their efficient machine of propaganda the main concern of European governments was the overwhelming reaction of panic that the expected bombing of the Luftwaffe might cause within the civil population During the Munich Agreement in 1938 the democracies were defended by old biplanes and a bunch of modern fighters 50 Hurricanes 20 Morane 405 and 5 Fokker D XXI France and Great Britain took up the production of USA airplanes and cancelled exports to small countries which were forced to design and build their own PANIC FIGHTERS with the intelligence and skill that desperation provides When nothing seemed able to contain the German advance France Great Britain and the USSR developed several programs of emergency fighters as did Australia to face the Japanese expansion At the time the course of events switched it was the Axis powers that had to create their own PANIC FIGHTERS some of them suicidal The present book includes several last resource designs of fighters that are practically unknown and that were developed in times of tribulation by Australia Belgium Bulgaria Canada Czechoslovakia Denmark Estonia Finland France Germany Great Britain Hungary Japan Yugoslavia Latvia Netherland Poland Romania Sweden and Switzerland Over the Front ,2000
