Tastes the Delicious Fruits of Your Labor today Simply put hydroponics is the process of cultivating and growing plants using water based mineral nutrient solutions It is categorized as a branch of soilless culture A form of plant cultivation similar to agriculture but instead of using soil it uses water to cultivate plants In this sense hydroponics is considered a branch of agriculture The basic idea of the technology is to add plants growing nutrients to water and use that water as a substitute for soil to grow plants Hydroponics proves that soil does not grow the plants In fact it is the combination of water nutrients and oxygen that makes them grow and produce edible crops
