

**MARK SCHEME for the November 2004 question papers**

**058/6551 MATHEMATICS**

**058/64, 058/65** Paper 2 (Extended), maximum raw mark 75

This mark scheme is published as an aid to teachers and students, to illustrate the requirements of the examination. It shows the basis on which Examiners were asked to award marks. It does not include the details of the discussions that took place at an Examiners' meeting before marking began. Any substantial changes to the mark scheme that arise from these discussions will be recorded in the published Report on the Examination.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the Report on the Examination.

4. CIE will not enter into discussion or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the November 2004 question papers for most IGCSE and OCE Advanced Level syllabuses.

web the key to solving exponential equations lies in logarithms let s take a closer look by working through some examples solving exponential equations of the form  $a \times b^x = d$  let s solve  $5 \times 2^x = 240$  to solve for x we must first isolate the exponential part to do this divide both sides by 5 as shown below
