**Surprised Again!—The COVID Crisis and the New Market Bubble** Alex J. Pollock, Howard B. Adler, 2022-11-15 What will not surprise you is the wisdom, wit, and insight that Alex Pollock and Howard Adler bring to this indispensable guide to financial prophecy. The future may be a closed book, but you must open and read this one. James Grant, Grant's Interest Rate Observer, *Surprised Again!* will demystify finance for students and give experts a deeper understanding of things they thought they knew. Christopher DeMuth, Distinguished Fellow, Hudson Institute and former President, American Enterprise Institute, A masterful survey of the financial sector and its post-COVID dependence on easy money from the Federal Reserve. This book is the first place to turn for a clear exposition of key financial topics: housing, municipal debt, pension funds, student loans, cryptocurrencies, and more. The reader will be surprised yet again at the extent of financial problems lurking below the surface. Thomas H. Stanton, Johns Hopkins University, About every ten years we are surprised by a financial crisis. In 2020 we were *Surprised Again!* by the financial panic of the spring triggered by the COVID-19 pandemic. Not one of the 30 official systemic risk studies developed in 2019 had even hinted at this financial crisis as a possibility or at the frightening economic contraction which resulted from the political responses to control the virus. In response came the unprecedented government fiscal and monetary expansions and bailouts. Later 2020 brought a second big surprise: the appearance of an amazing boom in asset prices including stocks, houses, and cryptocurrencies. Alex Pollock and Howard Adler lived through this historic instability while serving as senior officials of the U.S. Department of the Treasury. Their book lays out the many elements of the panic and its aftermath from the massive elastic currency operations which rode to the rescue by financing the bust with unprecedented government debt to the consequent asset price boom which included a renewed bubble in house prices financed by government guarantees. It considers key leveraged sectors such as commercial real estate, student loans, pension funds, banks, and the government itself. It reflects on how to understand these events both in retrospect and prospect.

Regulating Blockchain Philipp Hacker, Ioannis Lianos, Georgios Dimitropoulos, Stefan Eich, 2019-08-29 Less than a decade after the Financial Crisis we are witnessing the fast emergence of a new financial order driven by three different yet interconnected dynamics first the rapid application of technology such as big data machine learning and distributed computing to banking lending and investing in particular with the emergence of virtual currencies and digital finance second a disintermediation fuelled by the rise of peer to peer lending platforms and crowd investment which challenge the traditional banking model and may over time lead to a transformation of the way both retail and corporate customers bank and third a tendency of de bureaucratisation under which new platforms and technologies challenge established organisational patterns that regulate finance and manage the money supply These changes are to a significant degree driven by the development of blockchain technology The aim of this book is to understand the technological and business potential of the blockchain technology and to reflect on its legal challenges The book mainly focuses on the challenges blockchain technology has so far faced in its first application in the areas of virtual money and finance as well as those that it will inevitably face and is partially already facing as the SEC Investigative Report of June 2017 and an ongoing SEC securities fraud investigation show as its domain of application expands in other fields of economic activity such as smart contracts and initial coin offerings The book provides an unparalleled critical analysis of the disruptive potential of this technology for the economy and the legal system and contributes to current thinking on the role of law in harvesting and shaping innovation
