January 2014 International Paper C2

Christophe Gaudin, David White

January 2014 International Paper C2:

International Gear Conference 2014: 26th-28th August 2014, Lyon Philippe Velez, 2014-09-18 This book presents papers from the International Gear Conference 2014 held in Lyon 26th-28th August 2014. Mechanical transmission components such as gears, rolling element bearings, CVTs, belts and chains are present in every industrial sector and over recent years increasing competitive pressure and environmental concerns have provided an impetus for cleaner, more efficient and quieter units. Moreover, the emergence of relatively new applications such as wind turbines, hybrid transmissions and jet engines has led to even more severe constraints. The main objective of this conference is to provide a forum for the most recent advances addressing the challenges in modern mechanical transmissions. The conference proceedings address all aspects of gear and power transmission technology and range of applications: aerospace, automotive, wind turbine and others, including topical issues such as power losses and efficiency, gear vibrations and noise, lubrication, contact failures, tribodynamics and nano transmissions. A truly international contribution with more than 120 papers from all over the world. A judicious balance between fundamental research and industrial concerns. Participation of the most respected international experts in the field of gearing. A wide range of applications in terms of size, power, speed and industrial sector. **Law and Regulation of Mobile Payment Systems** Joy Malala, 2017-11-28 Over the last ten years, mobile payment systems have revolutionised banking in some countries in Africa. In Kenya, the introduction of M-Pesa, a new financial services model, has transformed the banking and financial services industry. Giving the unbanked majority access to the financial services market, it has attracted over 18 million subscribers, which is remarkable given that fewer than 4 million people in Kenya have bank accounts. This book addresses the legal and regulatory issues arising out of the introduction of M-Pesa in Kenya and its drive towards financial inclusion. It considers the interaction between regulation and technological innovation with a particular focus on the regulatory tools, institutional arrangements and government decisional processes through the examination, as a whole, of its regulatory capacity. This is done with a view to understanding the regulatory capacity of Kenya in addressing the vulnerabilities presented by technological innovation in the financial industry for consumers after financial inclusion. It also examines the way that mobile payments have been regulated by criticising the piecemeal approach that the Central Bank of Kenya has taken in addressing the legal and regulatory issues presented by mobile payments. The book argues there are significant gaps in the regulatory regime of mobile banking in Kenya. *Indonesia's Ascent* C. Roberts, A. Habir, L. Sebastian, 2015-03-10 This volume explores the domestic and transnational considerations associated with Indonesia's ascent, referring to its rise in terms of hard and soft power and its likely trajectory in the future. The range of contributors analyses economic resources, religious harmony, security, regional relations, leadership and foreign policy.
