

Application (For United States and Canada)

The secure Network Automation Engine (NAE-S) is a web-enabled, Ethernet-based, supervisory device that monitors and controls networks of field-level building automation devices, including HVAC equipment, lighting, security, and fire safety equipment. This document describes how to install an NAE-S (MS-NAE551S-2).

The NAE-S is hardened version of the standard NAE55 that uses embedded encryption technology to protect and secure the building management system at the endpoint. The engine meets the Federal Information Processing Standard (FIPS 140-2), Security Level 2, that specifies the use of a cryptographic module and a tamper-proof cover. The NAE-S is also Common Criteria certified. Figure 2 shows the NAE-S model.
