

Journal Article Critique

Sidawi, B. (2013). The tutors' views on the utilization of e-learning system in architectural education. *European Journal of Open, Distance and e-Learning*, Vol. 16 / No. 2.

1. Title

The title of the study is brief and informative. However, it is not completely clear. It does not clearly show the impact of the utilization of e-learning system in architectural education. Furthermore, it does not mention these useful insights into some theoretical issues and practical implications for policy makers both in the government and universities. Perhaps a better title would be *Architectural education: The impact of e-learning system on the teaching system*. However, the title make clear the population of interest which is tutors and the major variables; the utilization of e-learning system as an independent variable and architectural education as a dependent variable. Other than that, the title avoids vague, ambiguous, and emotion-laden terms.

2. Statement of the Problem

According to the researcher, the use of e-learning system was assessed by the e-learning deanship and it found that the system is of little use by the faculty of college of Architecture, University of Dammam. Furthermore, he add that a better understanding of the factors that reluctant the faculty to utilize the system and the utilization's obstacles could have theoretical and practical implications to policy makers (both the government and university). This study argues that potential shortages of the system should be dealt with; otherwise, the present e-learning system, as it is, will not respond to the architectural education's needs and would have negative impact on architectural education.

The problem of the study clearly stated. Architectural tutors are reluctant to use e-learning tools and they stick to the traditional face-to-face teaching methodology and tools informed us in undertaking this unique study. It aimed to find out the reason behind the negligence of e-learning tools and the negative attitude of the faculty towards this emerging technology, and how to encourage tutors to adopt and implement these e-learning tools in the architectural

How to Critique Journal Articles in the Social Sciences Scott R. Harris, 2013-09-23 This brief introductory book provides readers with a step by step guide to reading and understanding a social science research article The author demonstrates the many strengths of social research including its advantages over ordinary ways of knowing things and at the same time points out that research is inevitably flawed Rather than naively assuming that good research simply produces The Truth or cynically asserting that research is hopelessly biased and futile this book instills in readers a critical perspective one that appreciates the strengths and weaknesses of any piece of scholarship

How to Critique Journal Articles in the Social Sciences Scott R. Harris, 2022-01-03 Journal articles form the bedrock of social science but they can be unfamiliar and intimidating to students This brief introductory guide helps readers appreciate the rigor and pitfalls of research by comparing it to more ordinary ways of knowing Each chapter focuses on a key aspect of articles demystifying step by step the complexities of social research Harris encourages readers to avoid naivete accepting research findings as simple Truth and cynicism dismissing research as hopelessly flawed and instead adopt a critical perspective that appreciates the strengths and weaknesses of any piece of scholarship A new chapter on research design explores how scientists choose a broad approach to study a topic which impacts subsequent research decisions Exercises throughout allow readers to practice the highlighted techniques in class discussion short assignments or a major writing project Comprehensive yet succinct and accessible the second edition of *How to Critique Journal Articles in the Social Sciences* equips students with the confidence to read and understand social research for use in their education careers and personal lives

Scholarly Publishing and Research Methods Across Disciplines Wang, Viktor, 2018-11-09 There is no singular best method of research The differing nature of various research endeavors warrant multiple ways of generating knowledge sharing knowledge and more importantly avoiding errors More recently the dichotomy between quantitative and qualitative approaches has begun to dissolve as the integrated approach of mixed methods gains popularity *Scholarly Publishing and Research Methods Across Disciplines* is a collection of innovative findings on the methods and applications of research in scholarly publishing ranging from the analyzation of mixed methods and qualitative quantitative research to Dewey s scientific method and more Highlighting a range of topics including higher education digital divide and model development this publication applies a cross disciplinary viewpoint that will appeal to researchers graduate students academicians librarians scholars and industry leading experts around the globe seeking an understanding of the limitations and strengths in research techniques
