Does the Journal Impact Factor Help Make a Good Indicator of Academic Performance? Sudhanshu K. Mishra, 2010 Is journal impact factor a good measure of research merit This question has assumed a great importance after the notification of the University Grants Commission Minimum Qualifications for Appointment of Teachers and other Academic Staff in Universities and Colleges and Measures for the Maintenance of Standards in Higher Education Regulations 2009 on September 23rd 2009 Now publication of research papers articles in reputed journals has become an important factor in assessment of the academic performance of teachers in colleges and universities in India One of the measures of reputation and academic standard rank or importance of a journal is the so called Impact Factor This study makes a detailed statistical analysis of Journal Impact Factors across the disciplines It finds that if journal impact factor is used to assess the academic performance of individuals for the purpose of selection promotion etc and it is not borne in mind that due to vast differences in the nature of distribution of impact factors across the disciplines they are not justifiably comparable a below average scholar in the one discipline will rank higher and will be honored and benefitted more than another scholar in some other discipline wherein the journal impact factor is adversely skewed It may be noted that in the university departments there are specializations with low impact factor journals and other specializations with very high impact factor journals But the teachers researchers of different specializations in the departments compete with each other for promotion In this milieu the researchers with an unfortunate specialization wherein the journal impact factor is mingy or adversely skewed would receive injustice is plainly predetermined Therefore a measure such as the h index which quantifies the quality as well as productivity of an individual author scholar would be more appropriate than the journal impact factor The h index may be fine tuned and hence the g index or Tol s index may be used Nevertheless even the h index and the Tol s index would not be appropriate to the purpose of inter disciplinary or inter specialization comparisons A more informed and balanced judgment of the expert committee for selection appointment and promotion purposes will continue to be extremely important

Professional Writing in Kinesiology and Sports Medicine Mark Knoblauch, 2024-06-01 Publication of a research article can be a defining moment in a

researcher's career. However, the steps involved in turning an initial research question into a published article can be a long and arduous journey. To aid in this process, *Professional Writing in Kinesiology and Sports Medicine* was developed to serve as a comprehensive writing guide for research professionals and students who are looking to improve their academic writing skills. Dr. Mark Knoblauch and his 15 contributors developed *Professional Writing in Kinesiology and Sports Medicine* to focus around the area of manuscript development and presentation while also including chapters that outline the foundational concepts of professional writing, developing a research grant, and the journal selection process. Each chapter is written by content experts who bring a wealth of experience not only from their own academic writing but also from having spent countless hours helping students become better, more effective writers. Many textbooks have been written that focus on development of the research manuscript itself, but what sets *Professional Writing in Kinesiology and Sports Medicine* apart is that it includes so much more to aid writers in their process. What you can find inside: Examination of ancillary aspects associated with academic research such as poster and oral presentations; How to choose the most effective journal; How to deal with the stress of writing; How to write an effective grant. *Professional Writing in Kinesiology and Sports Medicine* covers those topics and more with the intent of providing a thorough, practical writing guide that spans the breadth of the research manuscript development, writing, and presentation process. Throughout the textbook, sample writings and cases relevant to the fields of kinesiology and sports medicine are used to provide the reader with relevant, applicable examples to help improve their own writing.
