Emanuel,Christine C. Grady,Robert A. Crouch,Reidar K. Lie,Franklin G. Miller,David D. Wendler,2011-02 The Oxford Textbook of Clinical Research Ethics is the first comprehensive and systematic reference on clinical research ethics Under the editorship of experts from the U S National Institutes of Health of the United States the book s 73 chapters offer a wide ranging and systematic examination of all aspects of research with human beings Considering the historical triumphs of research as well as its tragedies the textbook provides a framework for analyzing the ethical aspects of research studies with human beings Through both conceptual analysis and systematic reviews of empirical data the contributors examine issues ranging from scientific validity fair subject selection risk benefit ratio independent review and informed consent to focused consideration of international research ethics conflicts of interests and other aspects of responsible conduct of research The editors of The Oxford Textbook of Clinical Research Ethics offer a work that critically assesses and advances scholarship in the field of human subjects research Comprehensive in scope and depth this book will be a crucial resource for researchers in the medical sciences as well as teachers and students **Risk management strategies: monitoring and surveillance** Frans J.M. Smulders,John D. Collins,2023-08-28 For the veterinarian monitoring and surveillance represent the best means of ensuring sustainable animal production at a time when consumer demands reflect awareness that many of the hazards associated with food animal production can be minimised or avoided through proper management at the primary production level Preventive medicine and quality and safety assurance programmes are primarily based on knowledge of the existing strengths and weaknesses of

the clients enterprise and their ability to enact effective intervention measures Accordingly the food animal veterinarian relies upon effective monitoring of current performance and herd health status both for the purpose of maximising efficiency of production and providing an assurance that the primary food product meets required health standards in terms of freedom from those agents of concern that have their origin on the farm These agents include foodborne parasites pathogenic bacteria some of which display a resistance to antimicrobial agents contaminants of environmental origin as well as chemical and pharmaceutical residues The more successful these hazards are addressed at the farm the better the quality and safety of the final product and their marketing possibilities will be Communication between the primary producer and the food processing industry that facilitates real time exchange of information on these issues is essential for the practice of preventive medicine at the herd and flock level Integrated food chain quality and safety control programmes when linked to such monitoring and surveillance principles in regard to both human and animal health represent the means of achieving sustainable food animal production on a global scale in line with the conclusions of WTO and EU Volume 3 of the Food Safety Assurance and Veterinary Public Health series addresses this collaborative approach Leading international experts from academia industry and governmental institutions have been identified to deal with the various aspects of this collaborative approach in monitoring and surveillance
