| □         | □□        | □□□       |
| □         | □□        | □□□       |
- James says if he increases the pattern number by one, squares that number and then subtracts the pattern number increased by one he will get the general formula.  
 John says he can derive the general formula for the number of blocks by taking the number of columns in each pattern and multiplying it by the number of rows.
- Who is correct between James and John? Show your answer. (2)
