Alger, 2016-07-01 A comprehensive account and frank assessment of federal involvement in education is long overdue Education policy expert Vicki E Alger remedies this deficiency with her book *Failure The Federal Miseducation of America's Children* As its title indicates *Failure* makes no effort to sugar coat its findings Created in 1979 after a lobbying campaign that spanned generations the Department of Education has failed to live up to its promises Federal involvement whether related to testing funding or academic curricula has failed to abide by the Constitution's implication that education must remain the domain only of state and local governments and private institutions Most of all the central government's pervasive meddling in education has failed America's school children and their parents Education policy has long been mired in controversies often with opposing sides missing the mark *Failure* helps us step back from the skirmish du jour and redirects our focus to the big picture showing us what's gone wrong over the decades and the institutional causes of these failures It also offers a bold blueprint for returning the federal government to its constitutional role and for cultivating an educational system that meets the needs of students and parents rather than bureaucrats Concerned citizens of every stripe will benefit from *Failure's* history of federal education policy its brutally honest report card for the Department of Education its look at education systems across the globe and its ambitious policy recommendations *Failure* might even succeed in reframing the way the federal education establishment thinks about education policy **CFA Program Curriculum 2018 Level II** CFA Institute, 2017-08-01 Master the practical aspects of the CFA Program Curriculum with expert instruction for the 2018 exam The same official curricula that CFA Program candidates receive with program registration is now publicly available for purchase *CFA Program Curriculum 2018 Level II Volumes 1-6* provides the complete Level II Curriculum for the 2018 exam with practical instruction on the Candidate Body of Knowledge (CBOK) and how it is applied including expert guidance on incorporating concepts into practice Level II focuses on complex analysis with an emphasis on asset valuation and is designed to help you use investment concepts appropriately in situations analysts commonly face Coverage includes ethical and professional standards quantitative analysis economics financial reporting and analysis corporate finance equities fixed income derivatives alternative investments and portfolio management organized into individual study sessions with clearly defined Learning Outcome Statements Charts graphs figures diagrams and financial statements illustrate complex concepts to facilitate retention and practice questions with answers allow you to gauge your understanding while reinforcing important concepts While Level I introduced you to basic foundational investment skills Level II requires more complex techniques and a strong grasp of valuation methods This set dives deep into practical application explaining complex topics
